

THE AFRICA CONSULTING MARKET IN 2016

Including market sizing data, growth rates,
current market trends, and forecasts

EXECUTIVE SUMMARY

- 2015 was a good year overall for management consulting in Africa, the continent's 19 largest markets collectively growing 4.8% to reach a total value of US\$2,061m. Performance and opportunities vary greatly, however, from one region to the next, with things going slowly in the south, moderate growth in the north, and booming markets in the east and west.
- The southern Africa consulting market is dominated by the huge South Africa market, and so the regional market's fortunes suffered along with that nation's. The devaluation of the rand was sorely felt, not only dampening clients' willingness to invest but making it hard for international firms to demonstrate growth once their revenues were converted into dollars or euros back in their home markets; a tumultuous political situation did nothing to help. Other countries in the region—including Angola, Mozambique, and Zambia—did little better.
- The eastern Africa consulting market remains small relative to the region's larger economy, but it is growing rapidly and shows big potential. Middle-class expansion and a big increase in foreign investment combined with a relative lack of dependence on oil revenues made this a very good place to be a consultant in 2015. It was (and is), however, a difficult market for international firms to reach owing to the great difficulty of obtaining visas and work permits, especially in fast-growing Ethiopia.
- The market in western Africa continues to grow at a rapid pace despite this region being badly hit by the fall in oil and commodities prices. There is hope that a silver lining will emerge in the form of ramped-up efforts to diversify the region's economies in order to ward off such shocks in the future. Nigeria's new government is inspiring confidence, encouraging multinational corporations (MNCs) to take a new look at the country and so should generate consulting demand.
- Northern Africa's largest consulting market, Morocco, had a good 2015 with a stable economic and political situation holding the market in good stead and ensuring this remains a reliable hub for European businesses looking to expand into Africa. Things were a bit tougher in Egypt, as the political situation remains tense and the economy challenging. Tunisia and Algeria were also slow going last year.
- Though stability is on the rise across the continent, Africa remains a challenging place to do business. Even as the types of volatility seen on the continent come to look more like those seen in more mature economies, the swings can be more extreme: Election-related slowdowns can last much longer here than in Europe, and currency valuations can fluctuate rather wildly. Likewise, a lack of economic diversity means that the fall in oil and commodity prices has had an outsized impact in many markets. Diversification and professionalisation efforts are helping to improve the situation, creating consulting work in their own right while also helping to make these markets more navigable going forward.
- The rise of the African middle class is having a big impact on consulting, with companies eager to understand and make the most of the opportunities presented. Customer-facing initiatives in the retail industry and new product development in financial services are especially hot topics. But perhaps the biggest boon of all is the impact the growing middle class is having on digital uptake, thanks to mass smartphone penetration and consumer demand to conduct all business—from banking to retail to accessing government services—on mobile devices.
- As African economies grow and mature, domestic African clients are making up more and more of consulting's client base. Those clients are also coming from a wider range of industries and, as a result, are bringing more types of business problems to consultants. This has caused firms serving the market to reassess the services they're offering, establishing footholds in more markets, investing more in solutions aimed specifically at the African market, and increasing the amount of local talent on hand.
- Prospects for the rest of 2016 and on into 2017 look good overall, with the usual regional variations. Growth will continue to be very low in the difficult southern Africa market; moderate in the north; and very rapid in eastern and western markets. Perhaps even more telling, however, is how much consultants' expectations differ depending on the type of firm in which they sit: Those at smaller and mid-sized firms expect little change and perhaps even a slowing of demand through 2017 while those at large firms are considerably more optimistic about overall growth across the continent.

METHODOLOGY

Definitions

Our definition of management consulting includes a broad range of business advisory services, but excludes: tax advisory; audit; the implementation of IT systems; the delivery of outsourced/offshored services; and HR compensation/benefits administration and technology. Where mergers and acquisitions work is concerned, consulting on deals is included (under strategy), but corporate finance fees on deals themselves are generally not included although it is not always straightforward to separate the two.

For more information about how we classify consulting services and industries, please see “Definitions of industries and services”.

Sources

Our report is based on quantitative and qualitative research of consulting firms in Africa. The quantitative data contained in this report focuses on consulting done by mid- and large-sized consulting firms (those with more than 50 consultants) and typically includes work they have carried out for mid- and large-sized clients—what we at Source call “big consulting”. It therefore reflects the “addressable” market for the majority of mid- and large-sized consulting firms; we don’t try to track the long, thin tail of work done by very small firms for very small clients, nor the contractor market, as most readers of this report would not seek or be able to compete with this part of the market. Our analysts work out the addressable size of the market through desk research, identifying the number of firms that meet our criteria and extrapolating from that to reach a figure for the market as a whole.

Using this definition, Source has built a bottom-up model of the global consulting market from the information we get from consulting firms and our own research, and we use it to size the industry and its growth rates. This is based on our global model which contains detailed data about almost 1,600 firms, plus higher level estimates about a further 400,000 firms, all with more than 50 consultants apiece, in addition to primary research carried out by Source analysts.

Please note that our 2014 baseline figures have changed a little since last year, as we have refined and implemented improvements to our research methods. In particular, we have changed the structure of the report this year to cover the key geographies highlighted in each section as opposed to the whole of Africa, as in previous years. We are happy to provide subscribers with a restated set of 2014 baseline figures should this be of interest.

We should emphasise that there are no standard sources of definitions of data within geographies let alone between them. We are, however, confident that the richness of our qualitative data, combined with Source’s unparalleled industry expertise, means that our analysis fairly and accurately reflects the state of the market.

All figures given in this report are in US dollars. For reference, Source is using the following exchange rates in our reports this year:

- | | |
|------------------------------|-------------|
| • US dollar to British pound | \$1 = £0.66 |
| • US dollar to euro | \$1 = €0.88 |

In addition to our quantitative research, we interviewed 29 very senior consultants (typically the most senior person in their country) from most of the leading consulting firms in the region and many smaller local specialists to understand more about how the consulting market is performing, and what the major trends, changes, and challenges are. Throughout the year Source analysts remain plugged into the global consulting market through our bespoke research and consulting projects, adding further depth to our understanding of the consulting industry.

Definitions of industries and services

Industries

Energy & resources

Energy

Includes the exploration and production of energy, including oil, gas, coal, and renewables.

Utilities

Includes the delivery of electricity, gas, water, sanitation, and other related services.

Primary resources

Includes agriculture, chemicals and chemical products, commodities, forestry, fishing, metals, mining, and plastics.

Financial services

Banking

Includes retail banking, commercial banking, and lending.

Insurance

Includes general insurance (e.g., motor, home, pets, health—anything on an annual contract), life insurance, pension products, retirement planning.

Private equity

Includes both consulting work for private equity firms and consulting work with private equity portfolio businesses.

Capital markets

Includes investment banking, trading of stocks and financial products, corporate finance, and broking.

Investment and wealth management

Includes private banking, high net-worth banking, investment management, trust funds, the management of pension funds, and asset management.

Manufacturing

Aerospace

Includes space research and technology, the manufacture of aircraft, aircraft parts, rockets and other space equipment, and tanks and ammunition.

Automotive

Includes the manufacture of motor vehicles, industrial vehicles, and vehicle supplies and parts.

Construction

Includes surveying, architectural, and engineering services, heavy construction, house building, and the building of infrastructure.

Consumer packaged goods

Includes the manufacture of clothes, foods, alcohol, tobacco, furniture, home furnishings, cleaning products, small arms, children's toys, and sports equipment.

Consumer and industrial electronics

Includes electrical components, household and industrial appliances, commercial and professional equipment.

Industrial products

Includes industrial machinery, steel and metal products, and plastic products.

Pharma & biotech

Includes research into and the production of drugs, biological products, medicinal chemicals, and life sciences.

Healthcare

Includes private and publicly-funded healthcare, hospitals, laboratories, and medical equipment.

Public sector

Government

Includes federal/national, state/regional, local government, emergency services, justice, social services, public transport, and conservation.

Education

Includes public and private schools, universities, and libraries.

Defence

Includes national security and consulting around defence issues.

Retail

Includes the selling of clothes, food, consumer goods, and automobiles.

Services

Logistics

Includes warehousing, storage, packing and crating, and distribution including cargo, freight, and haulage.

Business services

Includes services relating to law, accountancy, IT maintenance, security systems, advertising, employment agencies, and vehicle leasing.

Leisure

Includes museums, art galleries, theatre, golf courses, hotels, hospitality, travel agencies, restaurants, and bars.

Real estate

Includes estate agencies and operators of residential and commercial buildings.

Transportation

Includes private and people-related transportation, including airlines, airport management, train operators, rail infrastructure management, water transportation, courier services, and private bus services.

Technology, media & telecoms

Telecoms

Includes telephone, mobile, digital, and other communication services.

High-tech

Includes IT related devices, computer and computer related devices, audio and video equipment, broadcasting and communication equipment.

Media

Includes radio, television and digital broadcasting stations and services as well as printing and the publishing of newspapers, periodicals, and books.

Services

Financial management

Includes finance function and budgeting/financial planning process.

Risk & regulatory

Includes responding to regulation, technology and security risk services, operational risk, financial risk, programme risk.

HR & change management

Includes HR strategy and effectiveness, benefits, compensation and pensions, change management, internal communications, organisational design and culture, stakeholder management, team effectiveness and collaboration, leadership and governance, performance management, talent management/training and development.

Operational improvement

Includes business continuity and recovery, knowledge management, Lean and Six Sigma, property and estate management, quality and performance management, supply chain management, cost-cutting, innovation, M&A integration, managing quality, post-M&A integration, process design and re-engineering, procurement/purchasing, research and development, benchmarking, distribution strategy, environmental, sustainability and CSR, and operational review.

Strategy

Includes business and financial modelling, corporate re-structuring, corporate recovery and turnaround, corporate strategy, market analysis and strategy, market research, policy formulation, strategic sourcing/offshoring strategy, due diligence and valuation, infrastructure/asset financing and management, PFI, mergers and acquisitions, customer service, new product development, branding, marketing and channel management, customer relationship management, pricing, sales force effectiveness, category management, sales and distribution planning.

Technology

Includes ERP consulting, IT training, application of new technology, hardware/software selection, IT design and build, IT strategy, planning and review, IT testing and integration, management information and business intelligence, requirements definition, mobile and internet consulting, project and programme management (e.g., where consulting firm has been engaged to run a specific project that it is otherwise not involved in).

CONTRIBUTORS

We are extremely grateful to all the people we spoke to for making this report possible. Below is a list of the individuals who have contributed from consulting firms (some consultants choose to remain anonymous).

Name	Job title	Firm
Lere Baale	Regional Director	Howes Group
Adam Boughton	Regional Executive Manager, Sub-Saharan Africa	Advisian
Aidan Brennan	Global Head of Management Consulting	KPMG

ABOUT THE AUTHORS

B.J. Richards

B.J. is Senior Editor at Source. An accomplished writer and editor, B.J. has provided strategic communications for a US senator, three presidents of Harvard University, a prominent American civil liberties advocacy group, and international law and consulting firms. She earned her juris doctorate from the University of Georgia and is a member of the Georgia bar.

Zoë Stumpf

Zoë leads Source's Consulting Market Programme. She has been with us since the beginning of 2012, and prior to this had more than 12 years working as a Management Consultant, firstly with KPMG where she led a number of operational improvement and post-merger integration projects, before moving on to be Head of Marketing and Internal Communications at Atos Consulting. She has also worked as an Independent Marketing Consultant at the UK Management Consultancies Association and at Xantus Consulting.

Alastair Cox

Alastair is an Analyst at Source and plays a key role in the development of our Consulting Market Programme reports. Prior to joining Source, Alastair worked as a management consultant with PwC, working on a multitude of projects across a number of different industries and service lines. He graduated from the University of Bath with first-class honours in French and Spanish with European Studies, and spent a year working in Paris and Valencia as part of his degree.

How to subscribe

You can either subscribe to the whole programme (the cheapest way of getting access to everything) or buy reports individually. All reports in the *Consulting Market Programme* come with a global licence, so once you've bought them you can use them anywhere in your firm.

For more details about how you can subscribe please contact [Alice Noyelle](#).

Reports for different regions vary in length but the content includes:

- Overall description of the market in the region/industry
- Data for the consulting market:
 - Regional report: by industry, service, and firm type
 - Industry report: by sector, service, and geography
- High-level breakdown:
 - Regional report: by geography within region
 - Industry report: by sector within industry
- Discussion about the current state of, and prospects for, the consulting market:
 - Regional report: by industry, service, and firm type
 - Industry report: by sector, service, and firm type
- Analysis of the key challenges and opportunities in the market
- Feedback from clients in selected regions
- Growth forecasts

Please note that this content is subject to slight changes and amendments
