

THE EASTERN EUROPE CONSULTING MARKET IN 2016

Including market sizing data, growth rates,
current market trends, and forecasts

EXECUTIVE SUMMARY

- Overall, Eastern Europe saw low but solid consulting growth in 2015, the market expanding 4.9% to reach a total value of €1,082m. But performance looked very different depending on where you sit: Markets in Poland, Czech Republic, and Slovakia all grew by more than 5%, while Romania and Hungary had a tougher year, both growing less than 2%.
- A turbulent political environment is top of mind for many of the region's consultants, with many concerned that a wave of populism, right-wing sentiment, and Euroscepticism will discourage foreign investment and put critical EU funds at risk. For the time being, few consultants outside the public sector say they fear an immediate negative impact on their firms, but many admit to following developments with a degree of anxiety.
- Euroscepticism notwithstanding, ties between Eastern and Western Europe continue to strengthen across a number of industries, and as a result, quite a bit of the consulting work being done in the region now actually initiates in the West. Whether that comes in the form of local projects directed by foreign headquarters or work for Western clients that's been "nearshored" to local consultants, assignments with roots outside the region have become big business over the last few years.
- While digitisation in the region continues to lag a good distance behind the world's largest economies, it did gain momentum in 2015 as client conversations about digital solutions became less theoretical and more concrete and some even embarked on implementation projects. For now, the few projects that do exist are largely about customer experience, but we expect Industry 4.0 to become a big force over the next few years.
- Looking at consulting by industry reveals that all enjoyed at least some growth in 2015, though some did better than others. Manufacturing, financial services, and retail were particularly good sources of work thanks to digital disruption becoming an issue for clients in these areas. Energy & resources had a tough year—as one might expect—as did consulting to the public sector.
- Most consulting service lines performed well in 2015, HR & change management being the only one to stay flat. Technology did best of the lot, thanks to growing client interest in digitisation. Operational improvement also had a good year as clients sought to get their ships in shape to make the most of the low-growth environment.
- The prospects for the remainder of 2016 look mixed. The desire to pursue digital solutions and move ahead with Industry 4.0 is strong, though some consultants worry it could be a long time before clients have the discretionary funds to take action. In terms of countries, we expect most will do well but that Poland could face a challenging year; given its enormous share of the market, that would likely be enough to ensure another year of low growth for Eastern Europe's consultants.

METHODOLOGY

Definitions

Our definition of management consulting includes a broad range of business advisory services, but excludes: tax advisory; audit; the implementation of IT systems; the delivery of outsourced/offshored services; and HR compensation/benefits administration and technology. Where mergers and acquisitions work is concerned, consulting on deals is included (under strategy), but corporate finance fees on deals themselves are generally not included although it is not always straightforward to separate the two.

For more information about how we classify consulting services and industries, please see “Definitions of industries and services”.

Sources

Our report is based on quantitative and qualitative research of consulting firms in Eastern Europe. The quantitative data contained in this report focuses on consulting done by mid- and large-sized consulting firms (those with more than 50 consultants) and typically includes work they have carried out for mid- and large-sized clients—what we at Source call “big consulting”. It therefore reflects the “addressable” market for the majority of mid- and large-sized consulting firms; we don’t try to track the long, thin tail of work done by very small firms for very small clients, nor the contractor market, as most readers of this report would not seek or be able to compete with this part of the market. Our analysts work out the addressable size of the market through desk research, identifying the number of firms that meet our criteria and extrapolating from that to reach a figure for the market as a whole.

Using this definition, Source has built a bottom-up model of the global consulting market from the information we get from consulting firms and our own research, and we use it to size the industry and its growth rates. This is based on our global model which contains detailed data about almost 1,600 firms, plus higher level estimates about a further 400,000 firms, all with more than 50 consultants apiece, in addition to primary research carried out by Source analysts.

Please note that our 2014 baseline figures have changed a little since last year, as we have refined and implemented improvements to our research methods. Specifically, we slightly understated the size of the public sector industry due to these changes in our research methodology. We are happy to provide subscribers with a restated set of 2014 baseline figures should this be of interest.

We should emphasise that there are no standard sources of definitions of data within geographies let alone between them. We are, however, confident that the richness of our qualitative data, combined with Source’s unparalleled industry expertise, means that our analysis fairly and accurately reflects the state of the market.

All figures given in this report are in dollars. For reference Source is using the following exchange rates in our reports this year:

- | | |
|------------------------------|--------------------|
| • US dollar to British pound | \$1 = £0.66 |
| • US dollar to euro | \$1 = €0.88 |

In addition to our quantitative research, we interviewed 10 very senior consultants (typically the most senior person in their country) from most of the leading consulting firms in the country and many smaller local specialists to understand more about how the consulting market is performing, and what the major trends, changes, and challenges are. Throughout the year Source analysts remain plugged into the global consulting market through our bespoke research and consulting projects, adding further depth to our understanding of the consulting industry.

Definitions of industries and services

Industries

Energy & resources

Energy

Includes the exploration and production of energy, including oil, gas, coal, and renewables.

Utilities

Includes the delivery of electricity, gas, water, sanitation, and other related services.

Primary resources

Includes agriculture, chemicals and chemical products, commodities, forestry, fishing, metals, mining, and plastics.

Financial services

Banking

Includes retail banking, commercial banking, and lending.

Insurance

Includes general insurance (e.g., motor, home, pets, health—anything on an annual contract), life insurance, pension products, retirement planning.

Private equity

Includes both consulting work for private equity firms and consulting work with private equity portfolio businesses.

Capital markets

Includes investment banking, trading of stocks and financial products, corporate finance, and broking.

Investment and wealth management

Includes private banking, high net-worth banking, investment management, trust funds, the management of pension funds, and asset management.

Manufacturing

Aerospace

Includes space research and technology, the manufacture of aircraft, aircraft parts, rockets and other space equipment, and tanks and ammunition.

Automotive

Includes the manufacture of motor vehicles, industrial vehicles, and vehicle supplies and parts.

Construction

Includes surveying, architectural, and engineering services, heavy construction, house building, and the building of infrastructure.

Consumer packaged goods

Includes the manufacture of clothes, foods, alcohol, tobacco, furniture, home furnishings, cleaning products, small arms, children's toys, and sports equipment.

Consumer and industrial electronics

Includes electrical components, household and industrial appliances, commercial and professional equipment.

Industrial products

Includes industrial machinery, steel and metal products, and plastic products.

Pharma & biotech

Includes research into and the production of drugs, biological products, medicinal chemicals, and life sciences.

Healthcare

Includes private and publicly-funded healthcare, hospitals, laboratories, and medical equipment.

Public sector

Government

Includes federal/national, state/regional, local government, emergency services, justice, social services, public transport, and conservation.

Education

Includes public and private schools, universities, and libraries.

Defence

Includes national security and consulting around defence issues.

Retail

Includes the selling of clothes, food, consumer goods, and automobiles.

Services

Logistics

Includes warehousing, storage, packing and crating, and distribution including cargo, freight, and haulage.

Business services

Includes services relating to law, accountancy, IT maintenance, security systems, advertising, employment agencies, and vehicle leasing.

Leisure

Includes museums, art galleries, theatre, golf courses, hotels, hospitality, travel agencies, restaurants, and bars.

Real estate

Includes estate agencies and operators of residential and commercial buildings.

Transportation

Includes private and people-related transportation, including airlines, airport management, train operators, rail infrastructure management, water transportation, courier services, and private bus services.

Technology, media & telecoms

Telecoms

Includes telephone, mobile, digital, and other communication services.

High-tech

Includes IT related devices, computer and computer related devices, audio and video equipment, broadcasting and communication equipment.

Media

Includes radio, television and digital broadcasting stations and services as well as printing and the publishing of newspapers, periodicals, and books.

Services

Financial management

Includes finance function and budgeting/financial planning process.

Risk & regulatory

Includes responding to regulation, technology and security risk services, operational risk, financial risk, programme risk.

HR & change management

Includes HR strategy and effectiveness, benefits, compensation and pensions, change management, internal communications, organisational design and culture, stakeholder management, team effectiveness and collaboration, leadership and governance, performance management, talent management/training and development.

Operational improvement

Includes business continuity and recovery, knowledge management, Lean and Six Sigma, property and estate management, quality and performance management, supply chain management, cost-cutting, innovation, M&A integration, managing quality, post-M&A integration, process design and re-engineering, procurement/purchasing, research and development, benchmarking, distribution strategy, environmental, sustainability and CSR, and operational review.

Strategy

Includes business and financial modelling, corporate re-structuring, corporate recovery and turnaround, corporate strategy, market analysis and strategy, market research, policy formulation, strategic sourcing/offshoring strategy, due diligence and valuation, infrastructure/asset financing and management, PFI, mergers and acquisitions, customer service, new product development, branding, marketing and channel management, customer relationship management, pricing, sales force effectiveness, category management, sales and distribution planning.

Technology

Includes ERP consulting, IT training, application of new technology, hardware/software selection, IT design and build, IT strategy, planning and review, IT testing and integration, management information and business intelligence, requirements definition, mobile and internet consulting, project and programme management (e.g., where consulting firm has been engaged to run a specific project that it is otherwise not involved in).

CONTRIBUTORS

We are extremely grateful to all the people we spoke to for making this report possible. Below is a list of the individuals who have contributed from consulting firms (some consultants choose to remain anonymous).

Name	Job title	Firm
Peter Benkovic	Partner	Maxman Consultants
Igor Boldyrev	Partner, Advisory, Russia	EY
Roland Falb	Managing Partner	Roland Berger Strategy Consultants
Christian Gurny	Partner, Romania	BearingPoint
Gabor Kornai	President	AAM Management Information Consulting Ltd
Sergey Lvov	Managing Partner	Aon Hewitt
Konrad Pych	President	ConQuest Consulting
Piotr Romanowski	Consulting Leader	PwC
Leszek Wronski	Managing Partner, Advisory	KPMG
Lorenzo Zennaro	Vice President—Managing Director CEE	EFESO

ABOUT THE AUTHOR

B.J. Richards

B.J. is Senior Editor at Source. An accomplished writer and editor, B.J. has provided strategic communications for a U.S. senator, three presidents of Harvard University, a prominent American civil liberties advocacy group, and international law and consulting firms. She earned her juris doctorate from the University of Georgia and is a member of the Georgia bar.

How to subscribe

You can either subscribe to the whole programme (the cheapest way of getting access to everything) or buy reports individually. All reports in the *Consulting Market Programme* come with a global licence, so once you've bought them you can use them anywhere in your firm.

For more details about how you can subscribe please contact [Alice Noyelle](#).

Reports for different regions vary in length but the content includes:

- Overall description of the market in the region/industry
- Data for the consulting market:
 - Regional report: by industry, service, and firm type
 - Industry report: by sector, service, and geography
- High-level breakdown:
 - Regional report: by geography within region
 - Industry report: by sector within industry
- Discussion about the current state of, and prospects for, the consulting market:
 - Regional report: by industry, service, and firm type
 - Industry report: by sector, service, and firm type
- Analysis of the key challenges and opportunities in the market
- Feedback from clients in selected regions
- Growth forecasts

Please note that this content is subject to slight changes and amendments
