

PERCEPTIONS OF CONSULTING IN THE GCC

Assesses the reputation of consulting firms,
as seen by clients

EXECUTIVE SUMMARY

If ever there were a prime example of the impossibly naff assertion that “to ASSUME makes an ASS of U and ME,” then clients’ perceptions of consulting firms in the GCC may just be it. This is a place where conventional wisdom about which consulting firms are seen as good at what gets chewed up and spat out in much the same way that motivational office posters probably ought to be.

To some extent, that’s likely to be about the maturity of the consulting market in the region. While clients in places like the UAE often have as much experience to go on as their counterparts in mature Western markets, others will be working with consultants for the first time and are likely to have far less knowledge and experience to call on. They’ll choose a firm based on who they know and may well use it for a much broader range of services than those with which it’s normally associated.

It also reflects the particular make of the region from a political, economic, social, and technological perspective. This, for example, is a region where challenges related to talent—and particularly to the scarcity of talent—reign supreme. That throws up results in this report that may feel counterintuitive to anyone not working in the region (and it may even feel counterintuitive to many working in the region), but when you start to understand the extent to which talent is the strategic challenge, you begin to appreciate how those results might be possible.

But perhaps there’s something else at play here. Perhaps, relatively speaking, the GCC is a blank canvas. We think of firms in a certain way elsewhere because that’s how we’ve always thought of them—McKinsey does strategy, Hay Group does HR, KPMG does financial stuff—rather than because it’s how they’re positioning themselves today. Indeed, someone who had never heard of any large consulting firms before may well take a look at the websites of the biggest 15 today and decide that they all did pretty much the same thing. There’s been plenty of talk about consulting firms of all hues converging on the same space in recent years, but while historical associations persist elsewhere (much to the chagrin of the firms themselves, of course), it stands to reason that they might not persist to the same degree in an emerging market. To that extent—while we do have to entertain the idea both that there are local peculiarities at play and even that clients might simply have some strange ideas—we perhaps ought to see the GCC not so much as an outlier where clients’ perceptions are concerned, but more as a barometer.

METHODOLOGY

Who did we talk to?

We have 543 responses from our survey of executives, directors, and senior managers in the GCC in November and December 2015, all of whom have been responsible for buying substantial volumes of consulting services in the previous year. They represent a wide range of industries and business functions, and 38% work in organisations that generate more than \$500m in revenue.

Figure 1

Respondents' level of responsibility

Figure 2

Respondents by country

Figure 3

Respondents by industry

Figure 4

Respondents by organisation size (revenue)

What did we ask them?

Each respondent was asked to tell us about three consulting firms and was presented with a list of 19 leading consulting firms in GCC. Clients did have the opportunity to tell us about consulting firms that weren't on the list, but this report focuses on the firms for which the number of responses was sufficient for us to carry out detailed analysis.

We asked each respondent to share their views on each of the three firms selected, focusing on the following areas:

- **Quality:** Their perception of the quality of service provided by each firm in ten different consulting services
- **Value:** Their view of how much value each firm added in relation to the fees paid for their services
- **Recommendations:** Whether they have recommended any of these firms for any consulting service
- **Attributes:** How they rate each firm and the individuals from it across a range of attributes.

How we rank firms in this report

In this report, we reveal the top-ranked firms in four areas: mindshare, quality, value and most recommended firm. We look at the top-ranked firms overall but also look at perceptions from one consulting service to the next, and by client type. However, we don't provide a breakdown by industry, because the sample size becomes too small to be reliable. If you have questions about the industries we've omitted from this report, please contact [Sarah Burgess](#).

Mindshare: We base our rankings on the numbers of respondents talking about each firm, relative to each other. To calculate that, we awarded a score of 100 to the most-mentioned firm and work out how many times each other firm was mentioned in relation to it.

Quality: We base our rating on the sum of the proportion of people who describe quality as either "high" or "very high". Where that produces an equal result between two firms, we take into account the share who have described quality as "very high" to determine the order in which they are ranked.

Value: We base our rating on the sum of the proportion of people who say that the value a firm delivers is greater (to any extent) than the fees it charges. Where that produces an equal result between two firms, we take into account the extent to which value is seen to be greater than fees (respondents had the choice of saying it was twice, five times, or ten times greater than fees) to determine the order in which they are ranked.

1 Our survey was launched before Korn Ferry's acquisition of Hay Group completed in December 2015.

Most recommended: We base our ranking on the proportion of people who say they have recommended a firm. Where that produces an equal result between two or more firms, those firms simply tie.

New for 2016:

The Source badge—an award given to those firms that have been rated number one by clients in a given region/industry for mindshare, quality, and value. If your firm has a badge next to its name and you'd like to find out more about how to use it externally, please contact [Ella-Sian Jolley](#).

The difference between direct and indirect clients

We talk about two types of clients in this report: direct and indirect.

Direct clients are clients who either have very recent experience of working with the firm they chose to tell us about or are working with it now.

Indirect clients are clients who feel qualified to share an opinion about a firm but aren't among their direct clients. They may have had exposure to the work the firm has done elsewhere in their organisation or have simply formed an impression based on reading a firm's thought leadership or being exposed to its marketing in some other form. In simple terms, indirect clients are prospects.

The differences between the opinions of these two types of clients tell us a lot about the differences between expectation (indirect clients) and reality (direct clients). But it also tells us something about the differences between a firm's marketing and what it actually delivers.

Discover more online

The data contained and referred to within this report is also available online, where it can be sorted and filtered according to your preferences.

When you log on, you'll notice that in some areas there's data that's in a faded grey colour. This is where we have data, but it's not a big enough sample to include in a ranking in this report. Nonetheless, we share it online in case you do want to see what, for example, indirect operations clients in the public sector (or a similarly complex split) think of a particular firm. If you have any questions about any of the data, please contact [Sarah Burgess](#).

To find out how you can get access to the online database, please contact the person in your organisation who bought the report or email ella-sian.jolley@sourceglobalresearch.com

Definitions of industries and services

Industries

Energy & resources

Energy

Includes the exploration and production of energy, including oil, gas, coal, and renewables.

Utilities

Includes the delivery of electricity, gas, water, sanitation, and other related services.

Primary resources

Includes agriculture, chemicals and chemical products, commodities, forestry, fishing, metals, mining, and plastics.

Financial services

Banking

Includes retail banking, commercial banking, and lending.

Insurance

Includes general insurance (e.g., motor, home, pets, health—anything on an annual contract), life insurance, pension products, retirement planning.

Private equity

Includes both consulting work for private equity firms and consulting work with private equity portfolio businesses.

Capital markets

Includes investment banking, trading of stocks and financial products, corporate finance, and broking.

Investment and wealth management

Includes private banking, high net-worth banking, investment management, trust funds, the management of pension funds, and asset management.

Manufacturing

Aerospace

Includes space research and technology, the manufacture of aircraft, aircraft parts, rockets and other space equipment, and tanks and ammunition.

Automotive

Includes the manufacture of motor vehicles, industrial vehicles, and vehicle supplies and parts.

Construction

Includes surveying, architectural, and engineering services, heavy construction, house building, and the building of infrastructure.

Consumer packaged goods

Includes the manufacture of clothes, foods, alcohol, tobacco, furniture, home furnishings, cleaning products, small arms, children's toys, and sports equipment.

Consumer and industrial electronics

Includes electrical components, household and industrial appliances, commercial and professional equipment.

Industrial products

Includes industrial machinery, steel and metal products, and plastic products.

Pharma & biotech

Includes research into and the production of drugs, biological products, medicinal chemicals, and life sciences.

Healthcare

Includes private- and publicly-funded healthcare, hospitals, laboratories, and medical equipment.

Public sector

Government

Includes federal/national, state/regional, local government, emergency services, justice, social services, public transport, and conservation.

Education

Includes public and private schools, universities, and libraries.

Defence

Includes national security and consulting around defence issues.

Retail

Includes the selling of clothes, food, consumer goods, and automobiles.

Services

Logistics

Includes warehousing, storage, packing and crating, and distribution including cargo, freight, and haulage.

Business services

Includes services relating to law, accountancy, IT maintenance, security systems, advertising, employment agencies, and vehicle leasing.

Leisure

Includes museums, art galleries, theatre, golf courses, hotels, hospitality, travel agencies, restaurants, and bars.

Real estate

Includes estate agencies and operators of residential and commercial buildings.

Transportation

Includes private and people-related transportation, including airlines, airport management, train operators, rail infrastructure management, water transportation, courier services, and private bus services.

Technology, media & telecoms

Telecoms

Includes telephone, mobile, digital, and other communication services.

High-tech

Includes IT related devices, computer and computer related devices, audio and video equipment, broadcasting and communication equipment.

Media

Includes radio, television and digital broadcasting stations and services as well as printing and the publishing of newspapers, periodicals, and books.

Services

Financial management

Includes finance function and budgeting/financial planning process.

Risk & regulatory

Includes responding to regulation, technology and security risk services, operational risk, financial risk, programme risk.

HR & change management

Includes HR strategy and effectiveness, benefits, compensation and pensions, change management, internal communications, organisational design and culture, stakeholder management, team effectiveness and collaboration, leadership and governance, performance management, talent management/training and development.

Operational improvement

Includes business continuity and recovery, knowledge management, Lean and Six Sigma, property and estate management, quality and performance management, supply chain management, cost-cutting, innovation, M&A integration, managing quality, post-M&A integration, process design and re-engineering, procurement/purchasing, research and development, benchmarking, distribution strategy, environmental, sustainability and CSR, and operational review.

Strategy

Includes business and financial modelling, corporate re-structuring, corporate recovery and turnaround, corporate strategy, market analysis and strategy, market research, policy formulation, strategic sourcing/offshoring strategy, due diligence and valuation, infrastructure/asset financing and management, PFI, mergers and acquisitions, customer service, new product development, branding, marketing and channel management, customer relationship management, pricing, sales force effectiveness, category management, sales and distribution planning.

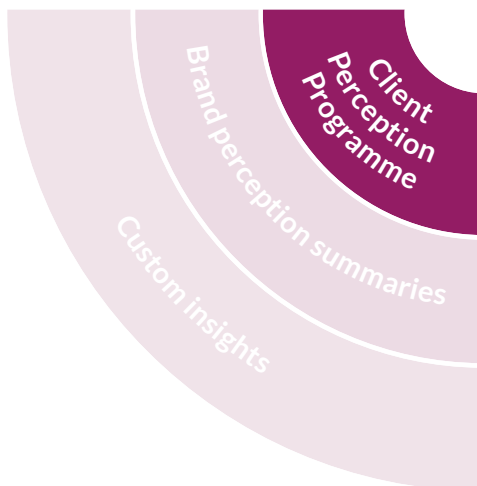

Technology

Includes ERP consulting, IT training, application of new technology, hardware/software selection, IT design and build, IT strategy, planning and review, IT testing and integration, management information and business intelligence, requirements definition, web and internet consulting, project and programme management (e.g., where consulting firm has been engaged to run a specific project that it is otherwise not involved in).

CLIENT PERCEPTION PROGRAMME

How to subscribe

You can either subscribe to the whole programme (the cheapest way of getting access to everything) or buy reports individually. All reports in the *Client Perception Programme* come with a global licence, so once you've bought them you can use them anywhere in your firm.

For more details about how you can subscribe please contact [Alice Noyelle](#).

The newest of our major research programmes, our *Client Perception Programme* is a suite of eleven reports that assess the reputation of consulting firms, as seen by clients.

At the heart of the programme are two important questions:

- What is the reputation of a consulting firm?
- What do clients think about the quality of service and the value added by consulting firms?

The first section of each report looks at the perceptions of clients in the market as a whole (either by geography or industry) and ranks the top three firms in each of the following areas: mindshare (how likely clients are to be thinking about a consulting firm), quality, value added, and likelihood to be recommended. The report then looks at perceptions by consulting service (and where relevant, by industry), ranking the top three firms for each. In our analysis we draw on our extensive knowledge of the consulting market to explain why particular firms are perceived as they are, and highlight interesting stories within the data along the way.

Finally, the report looks at clients' perceptions of individual firms in the relevant market. It compares each firm's mindshare, quality, and value perceptions with those of the leading firms, as well as comparing the views of direct and indirect clients to highlight the challenges that need to be addressed either during a project, or by marketing. The report also highlights which services clients are recommending each firm for, and what they perceive to be each firm's strongest attributes.

The *Client Perception Programme* can help you to:

- Understand how your consulting firm compares with competitors in the market
- Understand what clients and prospects see as your core strengths
- Where your clients think you can improve and where they want you to make improvements

Geographies and industries covered in this programme:

 GCC	 Energy & resources
 US	 Financial services
 UK	 Perceptions of procurement
 The Nordics	 Technology, media & telecoms
 Germany	 Healthcare
 France
