CONTENTS

Methodology 4
- Survey 4
- The role of this report in our series 4
- Definitions of industries and services 5

Introduction 7
- Clients are just as busy and willing to use consultants as they were in 2015 7
- The outlook is most positive in financial services, TMT, and manufacturing 8

Section 1: The why, who, and how of growth in 2016 12
- The why: What's on clients' agenda in 2016? 12
- The who: Will clients turn to consultants for help? 14
- The how: What role will clients want consultants to play? 17
- In summary… 18

Section 2: Which will be the growth industries in 2016? 19
- Financial services 19
- Manufacturing 22
- Public sector 25
- Energy & resources 28
- Services 31
- Technology, media & telecoms 34
- Healthcare 37
- Retail 40
- Pharma & biotech 43

Section 3: Which will be the growth services in 2016? 46
- Technology consulting 47
- Operational improvement consulting 49
- Risk & regulatory consulting 51
- Strategy consulting 53
- HR & change management 55
- Financial management consulting 57

Section 4: growth Forecasts 59
- Forecast by industry 59
  - Financial services 59
  - Manufacturing 60
  - Public sector 60
  - Energy & resources 61
  - Services 61
  - Technology, media & telecoms 62

METHODOLOGY

This report is based on quantitative research. We conducted an extensive survey in December 2015 and January 2016 with senior users and buyers of consulting services.

Survey

We surveyed just over 2,700 senior users and buyers of consulting services in 15 major consulting markets in North America, Europe, the Middle East, and Asia Pacific. Forty-two percent of respondents work in organisations with more than 1,000 employees (the percentage is higher in mature markets where large corporations are numerous). Respondents are distributed across operations, general management, sales & marketing, IT, finance, and HR. They represent nine sectors: energy & resources; financial services; healthcare; manufacturing; pharma & biotech; the public sector; retail; the services sector (including transportation and construction); and technology, media & telecoms.

The increased scale and scope of our survey creates potential problems in comparing this year's data with last year's. Our experience is that there's not a lot of variation in the way relatively large organisations use consultants, but there are some cases where our sample has had an impact and we highlight these.

Please note that all market size numbers are for 2014, the most recent year for which we have full data. Improvements in our research methods between 2013 and 2014 resulted in some market size numbers changing significantly from the 2013 estimates published in our 2015 Strategy Planning Programme Part 1 report. We are happy to provide subscribers with a restated set of 2014 baseline figures should this be of interest.

The role of this report in our series

This is the first in a series of six reports we will be publishing during the course of 2016 that will use a combination of feedback from clients and consulting firms to analyse the underlying trends shaping the consulting industry over the next 12 months.

The future publications in this series are:

Megatrend #1: Making consulting and IT services propositions work

Having spent the last few years cutting back their consulting operations in favour of delivering IT projects from low-cost locations, many IT services companies are now in the process of rebuilding their consulting presence. Most, though, are starting where they left off: with a flawed model of how consulting and IT services fit together.

This report will explore the relationship between management and IT consulting and other IT services, both from a client perspective (what they want, what they think they don't get), and from the point of view of suppliers themselves (how IT services companies are remodelling themselves, what impact this could have on the consulting industry).

Megatrend #2: Premium and commodity consulting: Is the string getting longer?

One of the most important trends our 2015 research highlighted was the extent to which clients are increasingly using consultants in two ways: in more familiar areas as a commodity but also in more innovative fields (e.g., digital transformation) where the characteristics of traditional, high-value management consulting come to the fore. Crucially, our research suggested that this division cut across conventional consulting boundaries and is increasingly seen as two different business models, making it hard for firms to do both at once.

This report will explore this theme in greater detail, looking at how this division is taking even more concrete shape in clients' minds and how consulting firms are responding to the challenge it creates to their business model.

Megatrend #3: M&A: Is it adding value?

The consulting industry has experienced unprecedented levels of consolidation over the last two years, but it's still far from clear how clients benefit from the trend. This report will analyse clients' views around this issue and explore how they'd construct such deals if they had a say.

Megatrend #4: Talent: Will the world run out of consultants?

With worldwide growth in consulting expected to be strong throughout 2016, the perennial war for talent is reaching new levels of ferocity, especially when it comes to senior people. Moreover, consulting firms are facing new competition from high tech companies and start-ups, making it hard for them to recruit a new generation of consultants, too. This report will look at how consulting firms are responding to the challenge this poses and asks what the winning strategy is likely to be.

Planning for growth in 2017

Our fourth annual market attractiveness index, which assesses each geographical market for the next 12 months in terms of things like: the rate of growth in the market, how easy it is to find and retain talent, how much revenue the average consultant can expect to generate, and the propensity amongst clients to use consultants.

Definitions of industries and services

Industries

Energy & resources

Energy
Includes the exploration and production of energy, including oil, gas, coal, and renewables.

Utilities
Includes the delivery of electricity, gas, water, sanitation, and other related services.

Primary resources
Includes agriculture, chemicals and chemical products, commodities, forestry, fishing, metals, mining, and plastics.

Financial services

Banking
Includes retail banking, commercial banking, and lending.

Insurance
Includes general insurance (e.g., motor, home, pets, health—anything on an annual contract), life insurance, pension products, retirement planning.

Private equity
Includes both consulting work for private equity firms and consulting work with private equity portfolio businesses.

Capital markets
Includes investment banking, trading of stocks and financial products, corporate finance, and broking.

Investment and wealth management
Includes private banking, high net-worth banking, investment management, trust funds, the management of pension funds, and asset management.

Manufacturing

Aerospace
Includes space research and technology, the manufacture of aircraft, aircraft parts, rockets and other space equipment, and tanks and ammunition.

Automotive
Includes the manufacture of motor vehicles, industrial vehicles, and vehicle supplies and parts.

Construction
Includes surveying, architectural, and engineering services, heavy construction, house building, and the building of infrastructure.

Consumer packaged goods
Includes the manufacture of clothes, foods, alcohol, tobacco, furniture, home furnishings, cleaning products, small arms, children's toys, and sports equipment.

Consumer and industrial electronics
Includes electrical components, household and industrial appliances, commercial and professional equipment.

Industrial products
Includes industrial machinery, steel and metal products, and plastic products.

Pharma & biotech

Includes research into and the production of drugs, biological products, medicinal chemicals, and life sciences.

Healthcare

Includes private- and publicly-funded healthcare, hospitals, laboratories, and medical equipment.

Public sector

Government
Includes federal/national, state/regional, local government, emergency services, justice, social services, public transport, and conservation.

Education
Includes public and private schools, universities, and libraries.

Defence
Includes national security and consulting around defence issues.

Retail

Includes the selling of clothes, food, consumer goods, and automobiles.

Services

Logistics
Includes warehousing, storage, packing and crating, and distribution including cargo, freight, and haulage.

Business services
Includes services relating to law, accountancy, IT maintenance, security systems, advertising, employment agencies, and vehicle leasing.

Leisure
Includes museums, art galleries, theatre, golf courses, hotels, hospitality, travel agencies, restaurants, and bars.

Real estate
Includes estate agencies and operators of residential and commercial buildings.

Transportation
Includes private and people-related transportation, including airlines, airport management, train operators, rail infrastructure management, water transportation, courier services, and private bus services.

Technology, media & telecoms

Telecoms
Includes telephone, mobile, digital, and other communication services.

High-tech
Includes IT related devices, computer and computer related devices, audio and video equipment, broadcasting and communication equipment.

Media
Includes radio, television and digital broadcasting stations and services as well as printing and the publishing of newspapers, periodicals, and books.

STRATEGIC PLANNING PROGRAMME

SOURCE GLOBAL RESEARCH

How to subscribe

You can either subscribe to the whole programme (the cheapest way of getting access to everything) or buy reports individually. All reports in the *Strategic Planning Programme* come with a global licence, so once you've bought them you can use them anywhere in your firm.

For more details about how you can subscribe please contact Alice Noyelle.

How the *Strategic Planning Programme* can help you

- **Deepens your understanding of the major trends shaping the consulting industry**
- **Helps you to identify what clients want from consulting firms in relation to major trends**
- **Helps you in your business planning activities**
- **Helps you to identify opportunities and threats in the market, and to develop strategies in response to them**

Our *Strategic Planning Programme* helps you to develop your strategy. It looks at the consulting market from a global perspective, picking out the trends that matter wherever you are and drawing extensively on our research with clients. In 2016 it splits into six parts, honing in—in parts 2, 3, 4 and 6—on the themes we're hearing most firms and most clients talking about at the moment.

Reports covered in this programme:

- **Forecasts for 2016**
- **Megatrend #1: Making consulting and IT services propositions work**
- **Megatrend #2: Premium and commodity consulting: Is the string getting longer?**
- **Megatrend #3: M&A: Is it adding value?**
- **Megatrend #4: Talent: Will the world run out of consultants?**
- **Planning for growth in 2017 (Market Attractiveness Index)**
