## **EXECUTIVE SUMMARY**

- Technology firms IBM and Accenture are top of mind, with clients in the region most frequently choosing to tell us about these firms. They're followed by McKinsey, then Big Four firms Deloitte and KPMG.
- A high rating in digital technology & transformation, as well as other tech-heavy services secures IBM and Accenture places as two of the three top-rated firms for overall quality. KPMG is also top-ranked with a generally strong rating for quality across most services.
- We see very different firms at the top when clients tell us about the value added by consulting firms. Oliver Wyman is most highly rated, although all clients say (or expect) returns on investment are limited to a sum worth about twice the fees paid.
- Generally, clients in the GCC hold quite tough opinions about the value added by consulting firms. Overall, just 30% describe the value added by consulting firms as worth more than the fees they paid; the majority (56%) say the value added and the fees are worth the same—working with consultants is a transaction, in other words. Our conversations with clients point to a much tougher environment for consultants, in which clients increasingly expect solid, tangible results. As they tighten their belts and come to terms with what many are calling a "new normal" in the region, clients' expectations of what constitutes value from consulting is rising.
- The firms that top our rankings reveal much about what's on clients' minds in the GCC. Technology expertise is of crucial importance, and we see IBM and Accenture appear frequently as highly rated firms across a range of services. We also see HR firms popping up in places you might not expect—places that seem surprising, until you think about the context of the GCC, in which talent and people-related issues are a huge strategic challenge.
- Cost-conscious clients seem to be wary of top-tier strategy firms at the moment. In
  part, this is probably down to the difficult time clients find themselves in and perhaps
  an over-reliance on them in the past. We also think it could be because the high
  price point raises their expectations of what "good" looks like, leading to harsher
  perceptions of quality, value, and attributes of these firms.

## **METHODOLOGY**

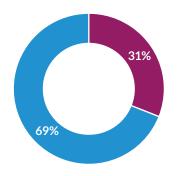

## Who did we talk to?

We have 600 responses from our survey of executives, directors, and senior managers in the GCC in November and December 2016, all of whom have been responsible for buying substantial volumes of consulting services in the previous year. They represent a wide range of industries and business functions, and 74% work in organisations that generate more than \$500m in revenue.

This report also includes qualitative research from interviews carried out in 2016 and 2017 with senior buyers of consulting in the GCC to bring aspects of our findings to life.

Figure 1

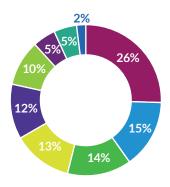

Respondents by level of responsibility

- Director/C-level
- Senior manager

Figure 2

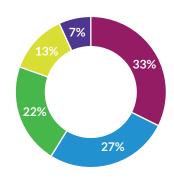

Respondents by industry

- Technology, media & telecoms
- Services
- Financial services
- Energy & resources
- Manufacturing
- Retail
- Healthcare
- Pharma & biotech
- Public sector

- 1,000-4,999 people
- 5,000+ people

Figure 6

Respondents by country

- Saudi Arabia
- **United Arab Emirates**
- Oman
- Qatar
- **Kuwait**

## What did we ask them?

Each respondent was asked to tell us about three consulting firms and was presented with a list of 17 leading consulting firms in GCC. Clients did have the opportunity to tell us about consulting firms that weren't on the list, but this report focuses on the firms for which the number of responses was sufficient for us to carry out detailed analysis.

We asked each respondent to share their views on each of the three firms selected, focusing on the following areas:

- **Quality:** Their perception of the quality of service provided by each firm in ten different consulting services
- Value: Their view of how much value each firm added in relation to the fees paid for their services
- Recommendations: Whether they have recommended any of these firms for any consulting service
- Attributes: How they rate each firm and the individuals from it across a range of attributes.

## How we rank firms in this report

In this report, we reveal the top-ranked firms in five areas: mindshare, quality, value, and most recommended firm. We look at the top-ranked firms overall, but where we can, we also split the data to look at perceptions in each consulting service, by client type, by industry, and by function (that is, looking at how views of respondents in different industries and different business functions vary). In breaking down the data to this level our sample sizes can become quite small, so where it isn't big enough for us to be confident making a ranking, we've declined to do so. That means that in this report we are unable to provide rankings by function or by industry. If you have questions about the industries we've omitted from this report, try visiting our online portal (see page 9, below), where you'll be able to see all the data we have in one place. If you have further questions, please contact info@sourceglobalresearch.com.

**Mindshare:** We base our rankings on the numbers of respondents talking about each firm relative to each other. To calculate that, we awarded a score of 100 to the most-mentioned firm, and work out how many times each other firm was mentioned in relation to it.

**Quality:** We base our rating on the sum of the proportion of people who describe quality as either "high" or "very high". Where that produces an equal result between two firms, we take into account the share who have described quality as "very high" to determine the order in which they are ranked.

**Value:** We base our rating on the sum of the proportion of people who say that the value a firm delivers is greater (to any extent) than the fees it charges. Where that produces an equal result between two firms, we take into account the extent to which value is seen to be greater than fees (respondents had the choice of saying it was twice, five times, or ten times greater than fees) to determine the order in which they are ranked.

**Most recommended:** We base our ranking on the proportion of people who say they have recommended a firm. Where that produces an equal result between two or more firms, those firms simply tie.

## Advertising these findings:

Firms like to use these findings in their own marketing and KPIs. Source's marketing licence allows you to publicise your ranking in advertising, editorials, presentations to external clients, below your email signature, and on your corporate website. The licence also allows you to use the Source "badge" within these. The badge is given to those firms that have been rated number one, two, or three by clients in a given sector/region for mindshare, quality and value.

Both the licence and the badge are valid for 24 months, and for more information, please contact <u>Ella-Sian Jolley</u>, or click here.

# HOW TO USE THIS CLIENT PERCEPTION STUDY

It's very important to be clear about what our Client Perception Studies are and are not:

What they're not are exhaustive studies of clients opinions about specific firms that remain statistically robust when filtered to provide detailed data about views at a very granular level of the market. So if, for instance, you want statistically robust data about what clients in the pharma sector in Germany think about McKinsey's operational improvement capabilities, you won't find it in these reports. We do profile individual firms in our reports to the extent we can—indeed this remains one of the most popular parts of the reports with readers—and we do, separately, provide Brand Perceptions Summaries of the world's leading consulting firms, but our Client Perception Studies are not designed to replace the sort of in-depth client research that many firms carry out (and often ask us to carry out for them).

What they are designed to do is provide a snapshot of views within a particular consulting market at a point in time. What they lack in detail about individual firms they make up for in three important ways:

- A multi-firm view. Our reports enabling consulting firms to see how they stack up against their competitors in the minds of clients.
- A view from prospects, not just existing clients. We include the views of people who aren't currently active clients of the firm they're telling us about, enabling us to understand what we tend to think of as a firm's brand pipeline and to compare the views of prospective and active clients. In doing this last, we're able to assess the extent to which clients' expectation of a firm are met in reality and how well a firm's marketing and delivery capabilities are aligned.
- Independence and expertise. The trouble with conducting your own client research is that clients are often reluctant to express negative views about firms (and people) with whom they've worked closely. They have no such concerns when they're telling us. Added to which, we're able to bring to bear the expertise we've gained over years of analysing the consulting market, helping to interpret the results within the context of the wider market and the strategic priorities of consulting firms.

It's important to remember that this is a study of client perceptions; a summarised view of what we're hearing from the market. It's not Source's view, nor is it a comment on market share or a recommendation to clients about which firms to buy from. The audience of these reports is very much the firms featured in them, and those interested in the strength of the competition in any given market.

## The difference between direct and indirect clients

We talk about two types of clients in this report: direct and indirect.

Direct clients are clients who either have very recent experience of working with the firm they chose to tell us about or are working with it now.

Indirect clients are clients who feel qualified to share an opinion about a firm but aren't among their direct clients. They may have had exposure to the work the firm has done elsewhere in their organisation or have simply formed an impression based on reading a firm's thought leadership or being exposed to its marketing in some other form. In simple terms, indirect clients are prospects.

The differences between the opinions of these two types of clients tell us a lot about the differences between expectation (indirect clients) and reality (direct clients). But it also tells us something about the differences between a firm's marketing and what it actually delivers.

## Discover more online

The data contained and referred to within this report is also available online, where it can be sorted and filtered according to your preferences. In fact, some of the charts contained in the report link directly through to the online database. Note that wherever you see a quick code next to the title of a chart, that code can be entered into the search function of the database to reproduce exactly the same chart.

## How to access the data

To access the data, you can go to the page where you downloaded this report and click on the "Explore the underlying data" button.

Alternatively, you can visit our website <a href="here">here</a> and log in using the same credentials you use to download the report.

You'll be taken to a landing page (Fig. 7) which will highlight the data you have access to with a green tick.

#### What can I do with the data?

From here, you will be able to filter all the data in this report on each of the key areas: mindshare, quality, value, recommendations, attributes, and important attributes.

## Figure 8

## An example of how you can filter our data —please note, dummy data used here

When you log on, you'll notice that in some areas there's data that's in a faded grey colour. This is where we have data, but it's not a big enough sample to include in a ranking in this report. Nonetheless, we share it online in case you do want to see what, for example, indirect operations clients in the public sector (or a similarly complex split) think of a particular firm. If you have any questions about any of the data, please contact info@sourceglobalresearch.com.

## **SOURCE REPORT PROGRAMMES**

## **CONSULTING MARKET PROGRAMME**

- A series of detailed reports that contain the most accurate view available about the consulting market in an extensive list of countries and regions. These explore key themes, provide market sizing data, growth forecasts, and deep analysis, all backed up by extensive quantitative and qualitative research amongst consulting firms and clients.
- As well as our country reports, we also produce a global view of four different industries. These reports contain industry analysis, market sizing data, and growth forecasts at a global level, as well as breakdowns by sub-sector, service, and geography.

## STRATEGIC PLANNING PROGRAMME

 A series of reports that take a detailed look at the big trends in the global consulting industry, interpreting them in terms of what they mean for consulting firms and who is best placed to exploit them.

## **CLIENT PERCEPTION PROGRAMME**

- A series of reports based on our huge client survey, that reveal what clients think about the leading consulting firms in a number of regions and industries. We rank the leading consulting firms in terms of clients' perceptions of things like quality and value.
- As part of this programme, we also publish brand perception summaries. These give an in-depth and unique view of the world's leading consulting firms. Available on request.

## **WHITE SPACE**

 A series of reports that analyse the quality and effectiveness of thought leadership. These are included in all White Space subscriptions.

## How to subscribe

You can either subscribe to a whole programme (the cheapest way of getting access to everything) or buy reports individually. All reports in our programmes come with a global licence, so once you've bought them you can use them anywhere in your firm.

## What's included

- A global licence.
- An executive summary (8-10 pages) highlighting key themes.
- Relevant content, updated regularly: blogs, podcasts, and spotlights.

## Want to know more?
