

Perceptions of Consulting in Technology, Media & Telecoms

Client Perception Programme

Our values and integrity

Our purpose is to help you grow your business. We aim to provide you with the best data and analysis to help you make the right decisions for your firm.

To that end, Source Global Research is completely independent of any professional services firm we work with or comment on. The views about each firm expressed in this report come from senior end-users of professional services; your clients and prospects, in other words. All analysis is our own—as experts in interpreting client data, our aim is to help you make sense of it and bring the important messages to your attention quickly.

It is not possible to influence our rankings either by subscribing to our research or by paying us money—it never has been, and it never will be.

How we can help your firm to deal with what's happening now and prepare for what comes next

Even before COVID-19, the professional services industry was entering a period of change the likes of which it had never experienced. But the pace of that change is now being accelerated, as firms respond to the crisis and reimagine their future in a changed world. We're working side by side with them, using our experience, data, and deep sector knowledge to help them create effective strategies for extraordinary times.

Real-time forecasting

Since mid-March, we've been supplementing our unique model of the global professional services sector with data collected from hundreds of consulting firms around the world. Our weekly updates have become the industry's satnav, providing up-to-date estimates of the likely impact of the crisis by region, sector, and service, which change as the market changes, helping consulting firms to adjust their strategy accordingly. But this publicly available data is for the market as a whole, and every firm faces a unique set of challenges. As you plan for the next 12-18 months, we can provide forecast data that's tailored to your business.

Immediate market feedback

One of the biggest challenges facing consulting firms is uncertainty: How has client behaviour changed as a result of the crisis? Whether we're leveraging our own research carried out over the previous few weeks, or undertaking custom research around your services and markets, we can provide you with quantitative and qualitative feedback very quickly, enabling you to take quick and informed decisions.

Client-led propositions

Past crises have shown that the speed with which a consulting firm adapts its services will determine its resilience—and that's truer than ever in the current environment, when clients' expectations around what's possible have radically shifted. They're looking to consulting firms to deliver better, faster solutions—and consulting firms will need to respond by being more precise about where they can add tangible value and more compelling in the way they articulate this. We've worked with many firms over the last decade helping them test their ideas with clients.

About us

We're nerds: We take a data-driven approach to helping firms take investment decisions. Since we started, we've invested millions in sophisticated, proprietary research techniques that give us unique insights into current and future trends.

We're experts: We've been focusing exclusively on the professional services sector for more than a decade, and we keep our knowledge up to date by interviewing hundreds of senior partners in professional services firms around the world each year.

We're future-focused: We undertake the largest regular quantitative surveys of the professional services sector anywhere in the world, and we're constantly talking to professional services firms' clients in order to understand how changes in their behaviour will reshape the industry in the future.

We're independent: Our analysis and recommendations are derived from our data and experience. We don't recommend firms to clients, and we will never tell you what you want to hear just because you've paid us.

We're obsessed with value: Our information and insights have underpinned some of the most strategic investment decisions made by professional services firms. That's because we know that, if we're going to have an impact, how we communicate is as important as what we communicate.

We're easy to work with: We'll work with you as you want, whether that's providing you with off-the-shelf data or multi-country custom research. Because we want our work to add value, we charge for what you need. We don't run a meter and we don't have complicated licensing that limits who can read our material.

How to use this Client Perception Study

It's very important to be clear about what our Client Perception Studies are, and are not:

What they're not are exhaustive studies of clients' opinions about specific firms that remain statistically robust when filtered to provide detailed data about views at a very granular level of the market. So if, for instance, you want statistically robust data about what clients in the pharma sector in Germany think about McKinsey's operational improvement capabilities, you won't find it in these reports. We do profile individual firms in our reports to the extent we can—indeed this remains one of the most popular parts of the reports with readers—and we do, separately, provide Brand Perception Summaries of the world's leading consulting firms, but our Client Perception Studies are not designed to replace the sort of in-depth client research that many firms carry out (and often ask us to carry out for them).

What they are designed to do is provide a snapshot of views within a particular consulting market at a point in time. What they lack in detail about individual firms they make up for in three important ways:

- **A multi-firm view.** Our reports enable consulting firms to see how they stack up against their competitors in the minds of clients.
- **A view from prospects, not just existing clients.** We include the views of people who aren't current active clients of the firm they're telling us about, enabling us to understand what we tend to think of as a firm's brand pipeline, and to compare the views of prospective and active clients. In doing this, we're able to assess the extent to which clients' expectations of a firm are met in reality, and how well a firm's marketing and delivery capabilities are aligned.
- **Independence and expertise.** The trouble with conducting your own client research is that clients are often reluctant to express negative views about firms (and people) with whom they've worked closely. They have no such concerns when they're telling us. Added to which, we're able to bring the expertise we've gained over years of analysing the consulting market to bear, helping to interpret the results within the context of the wider market and the strategic priorities of consulting firms.

It's important to remember that this is a study of client perceptions; a summarised view of what we're hearing from the market. It's not Source's view, nor is it a comment on market share or a recommendation to clients about which firms to buy from. The audience of these reports is very much the firms featured in them, and those interested in the strength of the competition in any given market.

Methodology

Who did we talk to?

We have 1,755 responses from our survey of executives, directors, and senior managers in the TMT sector in October to December 2019, all of whom have been responsible for buying substantial volumes of consulting services in the previous year. They represent a wide range of industries and business functions, and 85% work in organisations that generate more than \$500m in revenue.

For more information about the people we surveyed, please see the extended methodology section at the back of this report.

The difference between direct clients and prospects

We talk about two types of clients in this report: direct clients and prospects.

Direct clients are clients who have bought services from a firm on a reasonably regular basis. They're current clients, or ones with an ongoing relationship with a firm.

Prospects are clients who feel qualified to share an opinion about a firm but who aren't among the firm's direct clients. They may have had exposure to the work the firm has done elsewhere in their organisation or may have simply formed an impression based on reading a firm's thought leadership or being exposed to its marketing in some other form. In this research, we segment this group into those that are simply aware of a firm, and those that have shortlisted a firm but decided not to proceed with that firm.

The differences between the opinions of these two types of clients tell us a lot about the differences between expectation (prospects) and reality (direct clients). But they also tell us something about the differences between a firm's marketing and what it actually delivers.

Programme schedule for 2020

Reports 2020	Market Data & Analysis	Client & Brand Insights	Emerging Trends
January			
February	Forecasts for 2020 UK	UK	
March	GCC Benelux	GCC Nordics	The Future of Account Management
