“On the business modernisation side, over the next two to three years, it’ll be highly transformative for companies to have understood the power of technology.”

Srinivasa Kumar Yerchuru, TCS

What really matters

- Three things for a firm to act on6
- The big answers... on the financial services consulting market9

3

Clients are **willing to pay a premium** for work that requires a high level of expertise, but are also looking for capacity support across the sector.

59%

of clients say expertise is important when choosing a firm from a shortlist

Another prominent narrative that we saw in this sector was a need for talent. A huge majority of clients we polled in the sector discussed their difficulty in attracting talent with the right expertise in areas where they needed support, such as cybersecurity. They were looking for capability in growth strategy, and they were eager to find levers that allowed them to expand their revenue streams.

Clients continue to pay high prices for projects which need significant expertise, particularly strategy work, as clients seek to overhaul their operating models, as part of larger investments in business strategy. Many more clients are looking to increase their spending this year than in 2023, and there will likely be plenty of work in the sector for firms that are looking to target expertise-heavy bespoke projects.

However, clients are also in need of capacity support across the sector. While it often comes at a lower price point, clients are looking to expand the amount of such work they are doing this year. Firms that provide such support could also get preferential access to work requiring more expertise in the future, which will come at a higher price point.

2

Market overview

- The financial services consulting market in numbers 12
 - Breakdown by sub-sector 13
 - Breakdown by service 14
 - Sub-sector breakdown in 2023, by region 15
 - Service breakdown in 2023, by region 16

“There was a lot of nervousness coming into this financial year given macroeconomic uncertainty, geopolitical tensions, and half the world’s population going to the polls. This led to a lot of uncertainty.”

Simon Kent, Kearney

- Banking: The story across the sector 17
- Insurance: The story across the sub-sector 18
- Private equity: The story across the sub-sector 19
- Capital markets: The story across the sub-sector 20
- Investment & wealth management: The story across the sub-sector ...21
- Average growth in the global financial services consulting market will rebound from a downturn in 2023, but is yet to fully recover22
- The Middle East is home to a rapidly growing financial services consulting market, but the markets in Europe, North America, and Asia are still the largest23

3

“There has been more focus on strategic cost reduction, regulatory compliance and enhancing business resilience. However, more recently there are indications of increased discretionary spending, for example, technology transformation and M&A.”

Alex Birkin, EY

Client priorities

- What are clients’ top needs and priorities?25
- Where are clients set to invest?.....32
- Use of consultants.....36

Clients are experiencing severe issues attracting talent

Compounding their workforce issues, 91% of firms report at least moderate difficulty attracting talent. There are four key areas where there is significant overlap between where clients need to recruit current expertise and where they believe they will need capability over the next three years: cybersecurity, increasing revenue, growth strategy, and developing new products and services.

While clients typically build their plans for growth in-house, in the belief that they know their business better than any consultant, the fact that the latter three areas point to a lack of internal expertise in this area suggests there is an opportunity for firms to step in and advise.

Meanwhile, clients need cybersecurity talent as part of a broader strategy of increasing their resilience against external shocks, and firms that can provide this expertise are likely to be well-placed to win work.

Figure 13

To what extent are you struggling to attract the right talent in your organisation?

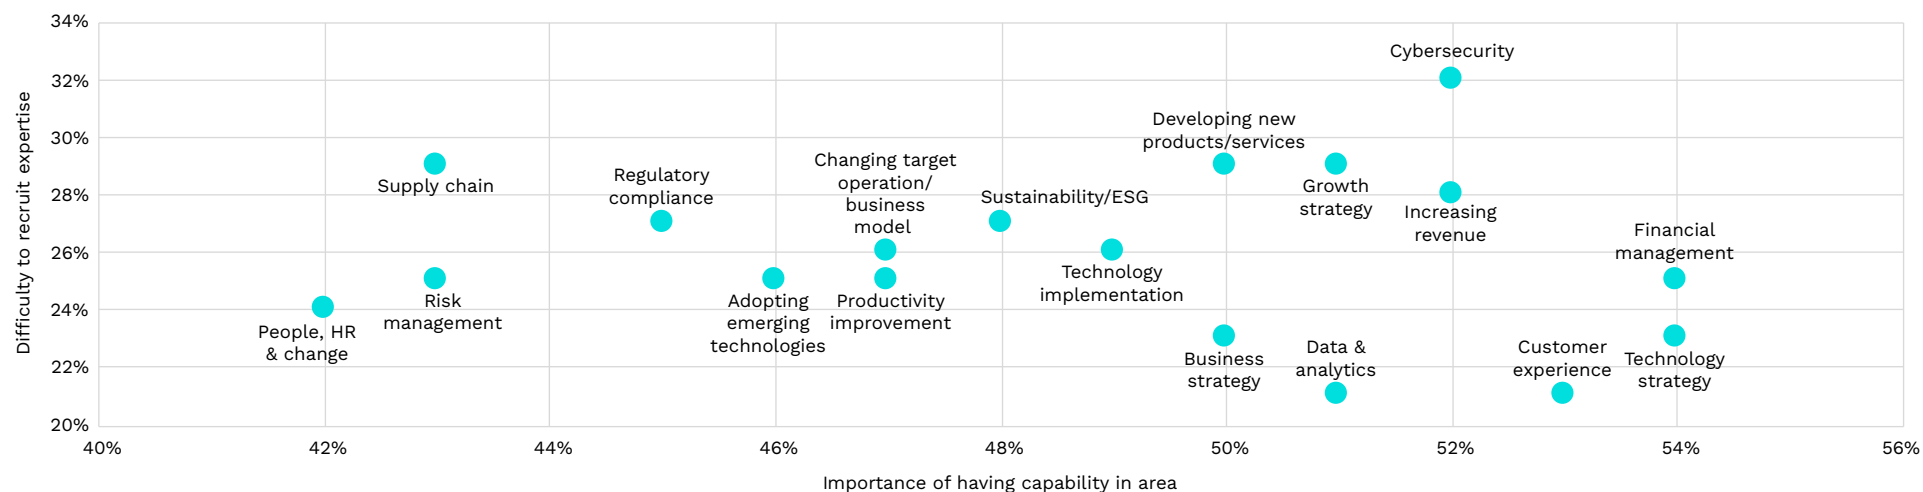

Figure 14

Areas that clients feel are important to have expertise in compared to areas that are difficult to recruit

Where are clients set to invest?

Clients are increasing their spending on digital technology and will continue to do so

Figure 16

How has your organisation's investment in digital technology changed in the last year?

Clients are already increasing their investment in digital technology and anticipate spending much more in future. This is driven by the desire to match their competitors and to modernise their systems, which may be outdated in places.

However, there is a significant sub-sector split in why clients are looking to increase their spending on digital technology. Private equity and insurance clients believe that they haven't invested enough in previous years, while clients in the capital markets sub-sector are primarily concerned with matching their competition. Clients in the insurance sector also said that their investment in digital technology would make them a more resilient business. Those in the investment and wealth management sub-sector say that their systems are up to date and don't need modernisation, but they are looking to increase their spending to improve the quality and range of their data, presumably in order to take full advantage of opportunities offered by generative AI. Meanwhile, clients in the banking sector told us that increasing their digital spend would improve productivity.

Firms looking to offer high capability projects centering on digital technologies should make sure they bear these sub-sector disparities in mind.

Figure 17

How do you expect your organisation's investment in digital technology to change in the next 18 months?

Figure 18

What is the main reason for the increased investment in digital technology in the next 18 months?

	Banking	Capital markets	Insurance	Investment & wealth management	Private equity
To keep up with competitors	#3	#1		=#2	=#2
We haven't invested as much as we should		=#2	#1		#1
To improve customer experience	#2	=#2		=#2	=#2
To give us better data and information			#3	#1	
To improve productivity	#1				=#2
To make us a more resilient business			#2		
To make us a greener business					

“Demand for audit services is increasing due to heightened assurance requirements around internal controls, regulatory compliance, and climate reporting.”

Karim Haji, KPMG

Implications for firms

- Price pressures are easing—but only slightly.....39
- Clients are most likely to buy technology strategy and business support in the next 18 months..... 40
- Expertise is a crucial consideration when clients decide which firm to work with..... 41

Price pressures are easing—but only slightly

We've seen a reduction in pressure on consulting fees in our latest survey. From 2023 to 2024, the number of clients saying that they expected prices to go up increased from 34% to 50%. This is likely a reflection of a change in the nature of the work that clients are looking for, with more strategic projects becoming increasingly prominent.

However, 36% of clients expect prices to fall—not an insignificant proportion, despite being smaller than the 50% who said the same last year. The standout reason clients expect to pay less in consulting fees in the next year is that they feel many firms could do the work—a reminder to firms to emphasise what they bring to the table that others don't. It is also notable that a portion of clients expect to pay lower fees because they need capacity rather than expertise. While this kind of work is indeed likely to come at a lower price point, it could lead to other projects in the future.

Figure 27

To what extent do you think that the prices consulting firms charge you will increase or decrease over the next 12 months?

Figure 28

Reasons why clients think prices they pay for external support will increase/decrease

Increase

1 We expect a high return on investment

2 Methodology for remote delivery is clear

3 Our needs are unique

4 The work is strategically important

Decrease

1 Many firms could do the work

2 Some work could be offshored

3 We need capacity rather than expertise

4 Similar work was cheap in the past

5

“Clients are starting to understand the costs of maintaining older systems. They need to modernise to reduce the risks related to these older systems.”

Scott Mullen, North Highland

Insights from consultants

- Alex Birkin, Global & EMEA Financial Services Consulting Leader and Managing Partner, EY 43**
- Karim Haji, Global and UK Head of Financial Services, KPMG..... 44**
- Simon Kent, Senior Partner Financial Services, Kearney45**

Our approach to gathering data

The market for professional services is vast and highly dynamic, with deep roots spread out across the business world. The Source MegaModel helps you get to grips with the facts.

The MegaModel is the largest and most comprehensive database of its kind, anywhere in the world. It's used by the world's leading firms to identify where growth is coming from, which markets to invest in, and which sectors are driving demand.

Methodology—The MegaModel

MegaModel: Our Global Data Model

The quantitative market data in this report comes from our unique model of the global professional services market.

Rather than making high-level assumptions, this model has been built from the bottom up, sizing the market capability by capability—assessing how much work a firm earns delivering each professional capability within each sector and country. This results in a robust view of the size of the supply-side market, which can then be broken down to view the size of the market by country, sector, line of business, capabilities, and service.

Alongside this market segmentation, we also limit our market sizing and analysis to what we at Source call “big consulting”—work done by mid and large-sized firms (those with more than 50 people). Please note that we don't track the long, thin tail of work done by contractors and very small firms, as most readers of this report would not seek or be able to compete in this part of the market.

All of the data in the model is calibrated through extensive interviews with, and surveys of, professional services firms and their clients, allowing us to discuss broader trends in the market alongside detailed dimensions such as headcount. These interviews and surveys are supplemented with desk research, which allows us to assess the impact of wider macroeconomic trends on professional services. This, combined with our detailed modelling, results in a long-term view of the market that is able to support both historic and forecast data.

All figures given in this report are in US dollars.

US dollar to British pound US\$1 = £0.80

US dollar to euro US\$1 = €0.92

The data in this report is rounded to the nearest whole number or stated decimal place. As a result, totals may display small discrepancies.

Who did we speak to

Client perspective

We carry out a client survey to help us build a rich picture of how different trends in the financial services sector are affecting clients' organisations and their use of consulting. Our survey focuses on trends in the financial services sector, providing detailed insights into the nuances of the market. For this, we surveyed 150 senior clients of consulting firms from across the financial services sector, all of whom work in organisations with more than 1,000 employees. This survey focuses on the following areas:

- How they expect to use consultants during the second half of 2024 and throughout 2025
- Factors that affect the way clients work with consulting firms
- The ways consulting firms market themselves to clients and the impact this has on client decision making.

Insights from consultants

Throughout the year, Source analysts remain plugged in to the global consulting market through our bespoke research and consulting projects, adding further depth to our understanding of the consulting industry.

In-depth desk research

We also conducted a thorough PEST analysis in the financial services sector that drills down into finer macroeconomic details on a holistic and sector-by-sector basis and allows us to fit our research into a wider macroeconomic picture.

Respondents by sub-sector

Respondents by function

Respondents by region

Respondents by seniority

Definitions of sectors and services

Sectors

Energy & resources

Energy

Includes the exploration and production of energy, including oil, gas, coal, and renewables.

Utilities

Includes the delivery of electricity, gas, water, sanitation, and other related services.

Primary resources

Includes agriculture, chemicals and chemical products, commodities, forestry, fishing, metals, mining, and plastics.

Financial services

Banking

Includes retail banking, commercial banking, and lending.

Insurance

Includes general insurance (e.g., motor, home, pets, health—anything on an annual contract), life insurance, pension products, and retirement planning.

Private equity

Includes both consulting work for private equity firms and consulting work with private equity portfolio businesses.

Capital markets

Includes investment banking, trading of stocks and financial products, corporate finance, and broking.

Investment and wealth management

Includes private banking, high net-worth banking, investment management, trust funds, the management of pension funds, and asset management.

Manufacturing

Aerospace

Includes space research and technology, the manufacture of aircraft, aircraft parts, rockets and other space equipment, and tanks and ammunition.

Automotive

Includes the manufacture of motor vehicles, industrial vehicles, and vehicle supplies and parts.

Construction

Includes surveying, architectural, and engineering services, heavy construction, house building, and the building of infrastructure.

Consumer packaged goods

Includes the manufacture of clothes, foods, alcohol, tobacco, furniture, home furnishings, cleaning products, small arms, children's toys, and sports equipment.

Consumer and industrial electronics

Includes electrical components, household and industrial appliances, commercial and professional equipment.

Industrial products

Includes industrial machinery, steel and metal products, and plastic products.

Pharma & life sciences

Includes research into and the production of drugs, biological products, medicinal chemicals, and life sciences.

Healthcare

Includes private and publicly-funded healthcare, hospitals, laboratories, and medical equipment.

Public sector

Government

Includes federal/national, state/regional, local government, emergency services, justice, social services, public transport, and conservation.

Education

Includes public and private schools, universities, and libraries.

Defence

Includes national security and consulting around defence issues.

Not for profit

Includes non-commercial research organisations, religious, political and professional membership organisations, trusts, labour unions, and business associations.

Retail

Includes the selling of clothes, food, consumer goods, and automobiles.

Services

Logistics

Includes warehousing, storage, packing and crating, and distribution including cargo, freight, and haulage.

Business services

Includes services relating to law, accountancy, IT maintenance, security systems, advertising, employment agencies, and vehicle leasing.

Leisure

Includes museums, art galleries, theatre, golf courses, hotels, hospitality, travel agencies, restaurants, and bars.

Real estate

Includes estate agencies and operators of residential and commercial buildings.

Transportation

Includes private and people-related transportation, including airlines, airport management, train operators, rail infrastructure management, water transportation, courier services, and private bus services.

Technology, media & telecoms

Telecoms

Includes telephone, mobile, digital, and other communication services.

High-tech

Includes IT-related devices, computer and computer-related devices, audio and video equipment, broadcasting and communication equipment.

Media

Includes radio, television, and digital broadcasting stations and services as well as printing and publishing of newspapers, periodicals, and books.

Services

We've taken the lines of business and capabilities from our taxonomy that broadly align with traditional definitions of consulting and divided them into services that include the following. Please note that for some lines of business, for example, forensics, we've taken a subset of the relevant capabilities and excluded others.

Cybersecurity consulting

Cybersecurity advice, Cybersecurity incident response, Penetration testing & wargaming, Technology & security risk services.

HR, change & people strategy

Benefits, compensation & pensions, excluding actuarial & investment advice, Change management, Diversity & inclusion, Employee engagement, Governance & board effectiveness, HR strategy & effectiveness, Leadership, Organisational design & culture, Organisational training & development, Outplacement, Pension fund evaluation & advice, Performance management, Stakeholder management, Talent management, Team effectiveness & collaboration, Resource-efficiency strategy, Purpose-led strategy & change, Resource-efficiency implementation, Social impact & trust.

Operations

Benchmarking, Business continuity & recovery, Cost cutting, Customer service, DevOps, Distribution strategy, Lean & Six Sigma, Operational review, Outsourcing advice, Post-M&A integration, Process design, re-engineering & automation, Procurement/purchasing, Property & estate management, Sales & distribution planning, Sales force effectiveness, Supply chain management, Target operating model, Sustainable supply chain, Corporate, occupier services & facilities management, Integrated real estate developer services, Real estate deal/transaction services.

Risk & financial management

Operational risk, Programme risk, Responding to regulation, Risk management, Budgeting/financial planning process, Debt advisory, Finance function, Financial advisory, Financial restructuring & insolvency, eDiscovery, Forensic accounting.

Strategy

Capital allocation strategy, Commercial due diligence & valuation, Financial due diligence, M&A transaction strategy, Operational due diligence, Portfolio & investment strategy, Public-private partnerships, Technology due diligence, Business & financial modelling, Category management, Channel management, Corporate recovery & turnaround, Corporate restructuring, Corporate strategy, Market analysis & strategy, Policy formulation, Pricing, Strategic sourcing/offshoring services, Real estate strategy, Environmental & social impact research, Macro/microeconomic research, Market research, Customer feedback, Customer segmentation, Employee feedback, Advanced analytics, Sustainable investment.

Technology & innovation

Ideation, Innovation management, Innovation strategy, Strategies for growth from innovation, Cloud advice, ERP consulting, IT strategy, planning & review, IT training, Programme management, Vendor selection, Clean technology, Green IT, Corporate identity, Graphic & UI design, UX & service design, Customer journey & UX benchmarking, Data visualisation, business intelligence & semantic layer.
