MARKET

**The Technology Consulting
Market in 2024-2025**

Report

Dec 2024

What's included in this report

Our reports offer a wealth of market sizing, growth, and forecast data alongside engaging, in-depth analysis of the trends that matter. Using our highly flexible, multidimensional model we provide firms with robust, trusted data to make informed decisions about strategic investments and plan for the future.

Geography model

Countries covered

Albania	Chile	Greece	Libya	Pakistan	Slovakia
Algeria	China	Hong Kong	Luxembourg	Papua New Guinea	Slovenia
Angola	Colombia	Hungary	Malaysia	Peru	South Africa
Argentina	Côte d'Ivoire	India	Mexico	Philippines	South Korea
Australia	Croatia	Indonesia	Morocco	Poland	Spain
Austria	Cyprus	Iran	Mozambique	Portugal	Sri Lanka
Bahrain	Czech Republic	Iraq	Myanmar	Qatar	Sudan
Belarus	Denmark	Ireland	Netherlands	Romania	Sweden
Belgium	Egypt	Israel	New Zealand	Russia	Switzerland
Bosnia	Ethiopia	Italy	Nigeria	Saudi Arabia	Taiwan
Brazil	Finland	Japan	North Macedonia	Serbia	Tanzania
Bulgaria	France	Kenya	Norway	Singapore	Thailand
Cameroon	Germany	Kuwait	Oman		Tunisia
Canada	Ghana	Lebanon			Turkey
					UAE

Contents

Underpinned by our MegaModel, our reports deliver an independent and objective understanding of the markets that matter most; including everything from key trends and growth opportunities to the latest views of consulting leaders and a detailed analysis of the buyer's voice.

1

What really matters

We identify the things that really matter to firms—a snapshot of the most important dynamics in the market.

The big answers

We ask Source's experts what they think are the big opportunities and risks in today's market.

>> Pages 5-10

2

Market overview

Bringing together our market data, forecasts, and analysis, we provide a comprehensive picture of the state of play from a geographical, sector, and line-of-business perspective.

>> Pages 11-17

3

Client priorities

Using data from our survey of senior buyers of tax advisory, we explore the most important priorities, opportunities, and challenges for clients.

>> Pages 18-26

4

What does this mean for firms?

We take a look at the factors influencing clients' buying behaviours, and what this means for the services firms provide.

>> Pages 27-34

5

Insights from consultants

In this series of interviews, senior leaders from professional services firms offer their perspectives on what really matters in the market today.

>> Pages 35-40

About this report

>> Pages 41-47

About us and other reports

>> Pages 48-49

1

“We are seeing increased investments in the banking industry, where new projects are being driven by digital transformations, in areas like payments, by the rise of compliance & reporting, or a need for greater efficiency.”

Arnaud Balssa, Capgemini Invent

What really matters

Three things for a firm to act on6

The big answers... on the technology consulting market9

3

Investment in digital technology will increase, and firms need to show they can build on and adapt transformation programmes.

95%

of clients will increase their investment in digital technology over the next 18 months

Two in three clients say they need to upgrade their technology as soon as possible. The figure increases to 74% when considering only those companies that have undergone a digital transformation process. This highlights the cyclical nature of investment in technology. Despite making significant investments, clients find themselves stuck in a cycle of searching for the latest cutting-edge technology that will allow them to build data-driven business cultures, enhance customer experiences, and boost organisational resilience. This is why 95% of clients say they will increase their investment in digital technology over the next 18 months and over half say this uplift will be considerable.

Firms are in a good position to benefit from this investment climate, not least because there is a concern around the paucity of employee skills for data & analytics, and the adoption of the latest technologies. It is important that firms show they can adapt to technology developments and build on existing transformation programmes: Twenty-six percent of clients that have used Big Four firms for recent digital transformations reported that the technology was already outdated. Firms must support their clients' growth planning into the future and ensure the adoption of emerging technologies can be used over time to improve critical decision making, identify patterns of customer behaviour, and automate repetitive business tasks.

2

“We’re [expecting the] industries that didn’t perform as well to pick up. With interest rate cuts in the US and the election being over, a lot of those early-stage buying cycles are starting to pick up steam.”

Bob Lavoy, Crowe

The technology consulting market by region	14
The technology consulting market by service.....	16
The technology consulting market by sector	17

3

Client priorities

Buyers of tech consulting services, particularly larger organisations, have reduced confidence as a result of the macroeconomic situation 19

Tech solutions will enable clients' top priorities, but the largest clients are focused on getting back the human touch 20

Both digital and supply chain transformation are currently the top investment priorities for clients 21

Technology is the top future investment priority for mid-sized clients 22

Tech solutions are increasingly being explored to replace mid-level and low-level jobs 23

Clients' digital transformations have resulted in varying degrees of success depending on the advisor used 24

It is nearly impossible for clients to keep up with technology developments, especially larger organisations 25

Clients are concerned about IT costs spiralling out of control 26

“Managed services are a natural extension of the value chain, especially for processes that are decisive for innovation or revenue generation. Clients are also happy for someone else to take over things like compliance, regulatory work, tax, or accounting.”

Dr. Ulrich Störk, PwC

Tech solutions are increasingly being explored to replace mid-level and low-level jobs

83%

of clients agreed that a good tech implementation makes a bigger difference than a good executive team

Clients are increasingly seeing technology solutions as a method of replacing some of their employees. The vast majority (around four fifths) of clients surveyed said that they are actively working to replace both mid-level and low-level jobs with technology solutions. This is somewhat expected as employees are often one of the most unpredictable elements of a business's operation. However, it is also worth pointing out that "actively working" does not mean that it would be successful, or that it will ever actually be implemented. Slimming down a workforce places a greater strain on the staff that remain, which could exacerbate problems even if some costs could be cut.

One finding that was somewhat surprising considering the seniority of the clients surveyed was that 83% agreed that a good tech implementation makes a bigger difference than a good executive team. This suggests that their existing tech implementations are not as optimised or as efficient as they should be, and need further improvement and/or transformation. A bad or inefficient technology implementation can create more problems than it solves, which could explain how a tech stack could be more valuable than a C-suite member.

Figure 10

Percentage of clients either agreeing or strongly agreeing with the following statements

Having a good tech implementation within our organisation makes a bigger difference than a good executive team

83%

We are actively working to replace low-level jobs with technology solutions

82%

We are actively working to replace mid-level jobs with technology solutions

77%

What does this mean for firms?

“Traditional strategy firms are increasingly developing their tech consulting capabilities, often to address Proofs of Concept and very high-level approaches. We’re also seeing more smaller, niche players with very specific vertical value propositions.”

Arnaud Balssa, Capgemini Invent

Clients are not slowing down investments in new technologies.....	28
The tech skills shortage is not seen as insurmountable anymore	29
Mid-sized clients are less likely to alter tech consulting projects after sign-off than larger clients	30
Clients expect to use more tech consulting support in the next 12 months.....	31
Clients looking to grow their businesses will likely be driven to consultants	32
Clients are more likely to hand over large chunks of responsibility than seek cheaper alternatives abroad	33
The more senior the client, the more open they are to remote consulting.....	34

Clients are not slowing down investments in new technologies

Figure 15

How has your organisation's investment in digital tech changed in the last year?

How has your organisation's investment in digital technology changed in the last year?

To what extent do you expect your organisation's investment in digital technology to change in the next 18 months?

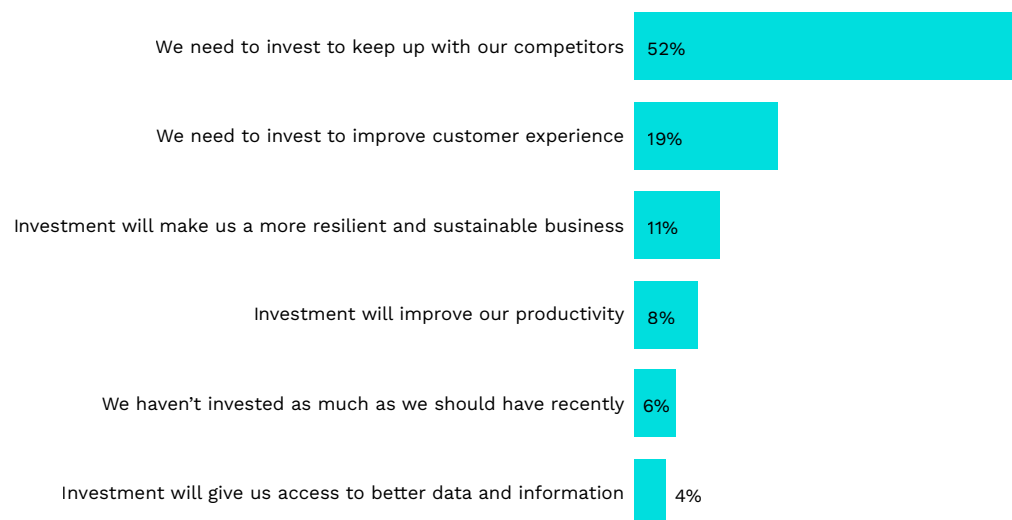

Clients' investments in digital technologies continue to increase, with no signs of slowing down. As we have seen consistently throughout most recent years, technology is not an area clients are looking to cut costs. More than 90% of clients increased their investment last year, and more than 90% of clients expect to increase it over the next 18 months—and a large portion of these are to a significant extent in both cases.

The main reason for this continued increase in investment appears to be a persistent fear of missing out or falling behind. More than half of clients surveyed said the main reason for their increased investment is to keep up with competitors. Technology advances, especially in AI over the past few years, have accelerated, further feeding client fears. This will help firms close bigger projects in this space, but ultimately without substance behind promises, clients might be left disappointed. Firms need to manage clients' expectations and make sure they demonstrate the practical benefits of new technologies, including AI.

Figure 16

What is the main reason for the increased investment in digital technology in the next 18 months?

5

“Interestingly, we’re seeing that our clients have a shortage of technology skills for older, legacy technology. Technologists coming out of school are not interested in working with ‘old code’.”

Kim Bozzella, Protiviti

Insights from consultants

Arnaud Balssa, Global Head of Business Technology, Capgemini Invent	36
Kim Bozzella, Global Leader of Technology Consulting, Protiviti	37
Bob Lavoy, Consulting Technology & Business Transformation Managing Principal, Crowe	38

Our approach to gathering data

The market for professional services is vast and highly dynamic, with deep roots spread out across the business world. The Source MegaModel helps you get to grips with the facts.

The MegaModel is the largest and most comprehensive database of its kind, anywhere in the world. It's used by the world's leading firms to identify where growth is coming from, which markets to invest in, and which sectors are driving demand.

Methodology—The MegaModel

MegaModel: Our Global Data Model

The quantitative market data in this report comes from our unique model of the global professional services market.

Rather than making high-level assumptions, this model has been built from the bottom up, sizing the market capability by capability—assessing how much work a firm earns delivering each professional capability within each sector and country. This results in a robust view of the size of the supply-side market, which can then be broken down to view the size of the market by country, sector, line of business, capabilities, and service.

Alongside this market segmentation, we also limit our market sizing and analysis to what we at Source call “big consulting”—work done by mid and large-sized firms (those with more than 50 people). Please note that we don't track the long, thin tail of work done by contractors and very small firms, as most readers of this report would not seek or be able to compete in this part of the market.

All of the data in the model is calibrated through extensive interviews with, and surveys of, professional services firms and their clients, allowing us to discuss broader trends in the market alongside detailed dimensions such as headcount. These interviews and surveys are supplemented with desk research, which allows us to assess the impact of wider macroeconomic trends on professional services. This, combined with our detailed modelling, results in a long-term view of the market that is able to support both historic and forecast data.

All figures given in this report are in US dollars.

US dollar to British pound US\$1 = £0.80

US dollar to euro US\$1 = €0.92

The data in this report is rounded to the nearest whole number or stated decimal place. As a result, totals may display small discrepancies.

Who did we speak to

Client perspective

We carry out a client survey to help us build a rich picture of how different trends in technology advisory services are affecting clients' organisations and their use of consulting. Our survey focuses on trends in technology advisory services, providing detailed insights into the nuances of the market. For this, we surveyed 150 senior clients of consulting firms from across technology advisory services, all of whom work in organisations with more than 1,000 employees. This survey focuses on the following areas:

- How they expect to use consultants during 2024 and the first half of 2025
- Factors that affect the way clients work with consulting firms
- The ways consulting firms market themselves to clients and the impact this has on client decision making.

Insights from consultants

Throughout the year, Source analysts remain plugged in to the global consulting market through our bespoke research and consulting projects, adding further depth to our understanding of the consulting industry.

In-depth desk research

We also conducted a thorough PEST analysis in technology advisory services that drills down into finer macroeconomic details on a holistic and sector-by-sector basis and allows us to fit our research into a wider macroeconomic picture.

Respondents by sector

Respondents by geography

Respondents by organization size

Respondents by seniority

Definitions of sectors and services

Sectors

Energy & resources

Energy

Includes the exploration and production of energy, including oil, gas, coal, and renewables.

Utilities

Includes the delivery of electricity, gas, water, sanitation, and other related services.

Primary resources

Includes agriculture, chemicals and chemical products, commodities, forestry, fishing, metals, mining, and plastics.

Financial services

Banking

Includes retail banking, commercial banking, and lending.

Insurance

Includes general insurance (e.g., motor, home, pets, health—anything on an annual contract), life insurance, pension products, and retirement planning.

Private equity

Includes both consulting work for private equity firms and consulting work with private equity portfolio businesses.

Capital markets

Includes investment banking, trading of stocks and financial products, corporate finance, and broking.

Investment and wealth management

Includes private banking, high net-worth banking, investment management, trust funds, the management of pension funds, and asset management.

Manufacturing

Aerospace

Includes space research and technology, the manufacture of aircraft, aircraft parts, rockets and other space equipment, and tanks and ammunition.

Automotive

Includes the manufacture of motor vehicles, industrial vehicles, and vehicle supplies and parts.

Construction

Includes surveying, architectural, and engineering services, heavy construction, house building, and the building of infrastructure.

Consumer packaged goods

Includes the manufacture of clothes, foods, alcohol, tobacco, furniture, home furnishings, cleaning products, small arms, children's toys, and sports equipment.

Consumer and industrial electronics

Includes electrical components, household and industrial appliances, commercial and professional equipment.

Industrial products

Includes industrial machinery, steel and metal products, and plastic products.

Pharma & life sciences

Includes research into and the production of drugs, biological products, medicinal chemicals, and life sciences.

Healthcare

Includes private and publicly-funded healthcare, hospitals, laboratories, and medical equipment.

Public sector

Government

Includes federal/national, state/regional, local government, emergency services, justice, social services, public transport, and conservation.

Education

Includes public and private schools, universities, and libraries.

Defence

Includes national security and consulting around defence issues.

Not for profit

Includes non-commercial research organisations, religious, political and professional membership organisations, trusts, labour unions, and business associations.

Retail

Includes the selling of clothes, food, consumer goods, and automobiles.

Services

Logistics

Includes warehousing, storage, packing and crating, and distribution including cargo, freight, and haulage.

Business services

Includes services relating to law, accountancy, IT maintenance, security systems, advertising, employment agencies, and vehicle leasing.

Leisure

Includes museums, art galleries, theatre, golf courses, hotels, hospitality, travel agencies, restaurants, and bars.

Real estate

Includes estate agencies and operators of residential and commercial buildings.

Transportation

Includes private and people-related transportation, including airlines, airport management, train operators, rail infrastructure management, water transportation, courier services, and private bus services.

Technology, media & telecoms

Telecoms

Includes telephone, mobile, digital, and other communication services.

High-tech

Includes IT-related devices, computer and computer-related devices, audio and video equipment, broadcasting and communication equipment.

Media

Includes radio, television, and digital broadcasting stations and services as well as printing and publishing of newspapers, periodicals, and books.

Services

We've taken a selection of lines of business and capabilities from our taxonomy and divided them into three categories of technology services. Please note that for some lines of business, we've taken a subset of the relevant capabilities and excluded others. For our full line of business model, please refer to the map on page 3 of this report.

Advisory

Cybersecurity advice, Cybersecurity incident response, Penetration testing & wargaming, Technology due diligence, Network strategy & architecture, Digital product quality assurance & testing, Digital product R&D, IoT and connected devices, Solution architecture, Clean technology, Green IT, Cloud advice, ERP consulting, IT strategy, planning & review, IT training, Programme management, Vendor selection.

Implementation

Cybersecurity implementation, Data warehousing & database management, Machine learning, Network installation, Network optimisation, DevOps, Application development, Virtual, augmented & mixed reality, Functional & industry application integration, Microsoft, Oracle, Salesforce, SAP, Workday, AI advice & implementation, Cloud implementation, Geospatial advice & implementation, Robotics advice & implementation.

Tech-supported

IT outsourcing, Building & engineering analytics, Advanced analytics, Data visualisation, business intelligence & semantic layer, Corporate identity, Graphic & UI design, UX & service design, Customer journey & UX benchmarking, eDiscovery, Forensic technology solutions, Technology & security risk services.

About us

We help professional services firms understand what really matters when facing decisions of vital importance.

The best decisions are based on evidence, objectivity, and a willingness to change. That's why, at Source, we tell you what you need to hear, rather than what you want to hear.

We draw upon our deep roots within the professional services sector to provide firms with a clear picture of their clients' worlds. Through comprehensive research and meticulous analysis, we pinpoint what truly matters and deliver actionable insights that help firms map out the right way forward.

We believe in thriving individually and succeeding together. And we would love to help your firm crack its latest conundrum.
