MARKE

The DACH Consulting Market in 2025

Report

About us

We partner with professional services firms to turn insight into strategic advantage. Our proprietary research and tailored, firm-specific studies provide clear, actionable guidance to inform your firm's strategic decisions.

Through our work, we help professional services firms to:

- Anticipate key industry trends
- Identify and evaluate growth opportunities in existing and emerging markets
- Understand client perceptions and competitive positioning
- Refine propositions and messaging to better align with client needs
- Maximise the reach, impact, and commercial value of thought leadership

To dig deeper into the insights in this report, explore our other publications, or learn more about bespoke research for your firm, please **get in touch**.

What's included in this report

Our reports offer a wealth of market sizing, growth, and forecast data alongside engaging, in-depth analysis of the trends that matter. Using our highly flexible, multidimensional model we provide firms with robust, trusted data to make informed decisions about strategic investments and plan for the future.

larket Trends | The DACH Consulting Market in 2025

Contents

Underpinned by our MegaModel, our reports deliver an independent and objective understanding of the markets that matter most; including everything from key trends and growth opportunities to the latest views of consulting leaders and a detailed analysis of the buyer's voice.

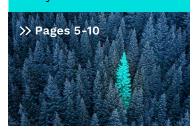

What really matters

We identify the things that really matter to firms—a snapshot of the most important dynamics in the market.

The big answers

We ask Source's experts what they think are the big opportunities and risks in today's market.

Market overview

Bringing together our market data, forecasts, and analysis, we provide a comprehensive picture of the state of play from a geographical, sector, and line-of-business perspective.

3

Client priorities

Using data from our survey of senior buyers of consulting, we explore the most important priorities, opportunities, and challenges for clients.

Implications for firms

We take a look at the factors influencing clients' buying behaviours, and what this means for the services firms provide.

Insights from consultants

In this series of interviews, senior leaders from professional services firms offer their perspectives on what really matters in the market today.

About this report

>> Pages 50-56

About us and other reports

>> Pages 57-58

"In a recessionary environment, the impact is felt first in consulting and service industries, and we're still navigating economic uncertainty."

Alexander Lippner, KPMG

What really matters

| Three things for a firm to act on6 | |
|--|--|
| The big answers on the DACH consulting market9 | |

3

Clients are looking to trusted firms to help them build a clear strategic path to navigate their new challenges.

of clients tell us they rely heavily on consulting services in 2025, up from 55% in 2024 The complexity of the business landscape makes it more likely that clients will turn to consulting services in 2025: Not only must they manage costs carefully, but they also need to invest for the future. However, what clients want from consulting has changed. Whereas in 2024, they told us they were looking for radical solutions, now it is concrete results. There has also been a shift from working with new firms to working with ones they already know, suggesting clients are focused on trust to make sure the projects they embark on are carried out well.

Many clients are deeply concerned that they are dealing with a new range of issues and challenges, most of which they have little prior experience of. This is why trust is so important. But so too is expertise on specific challenges, be it around workforce management, business model adaptation, or building resilience. Over 50% of clients tell us they want more conversations with consulting firms around the specific business challenges they face.

Clients are aiming to set a clear strategic path to meet the demands of an evolving set of political, economic, regulatory, and consumer trends. It is in this context that 58% of organisations say they will work more with strategy firms over the next 12 months and 57% say they will use the Big Four firms more this year.

"It was a challenging year for the economy. There was high demand in restructuring, performance, and transformation work, but lower demand in automotive and energy intensive industries like chemicals and steel."

Torsten Henzelmann, Roland Berger

| The DACH consulting market is set to remain steady in 2025, following a year of modest recovery | . 16 |
| Growth in consulting spending has been driven by risk, cybersecurity, and technology services | . 17 |
| Clients in pharma and energy are set to see the strongest growth in consulting spending, but financial services remains the | |
| largest industry | 12 |

"Overall, the outlook for 2025 tends to be challenging, with a key focus on survival and future-proofing. Clients are prioritising cost efficiency and are looking to integrate AI both in their internal processes and in customer-facing products."

Marco Lehmann, KPMG

Client priorities

| What are clients' top needs and priorities? | 20 |
|---|----|
| Where are clients set to invest? | 25 |
| Use of consultants | 31 |

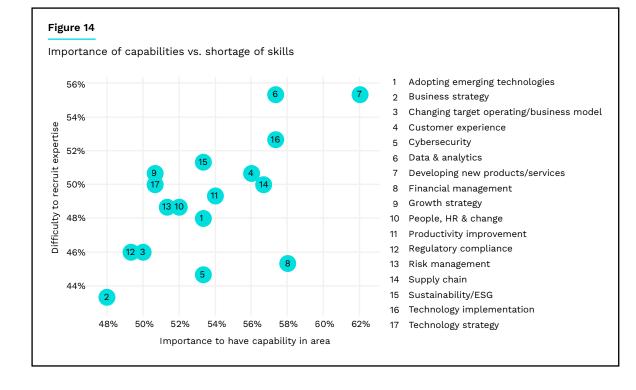

Skills relating to developing new products and data & analytics are the most in-demand

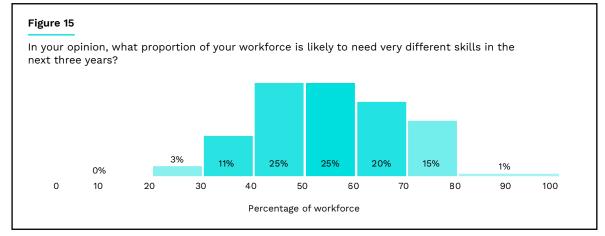

When asked about which capabilities were very important to have within their organisation, skills relating to the development of new products & services, financial management, and data & analytics came out on top. With clients' confidence dented by consumers economising on services, they are eager to develop products and services that will attract the attention of consumers even when their buying confidence has been impacted.

Financial management was also deemed as being a particularly important category, a sign that cutting costs are still at the forefront of clients' minds in the DACH region. We know this as 55% of clients told us that they are likely to cut discretionary costs in the next 12 months as a result of the current macroeconomic climate in the region. Another 35% say they will limit recruitment over this same period.

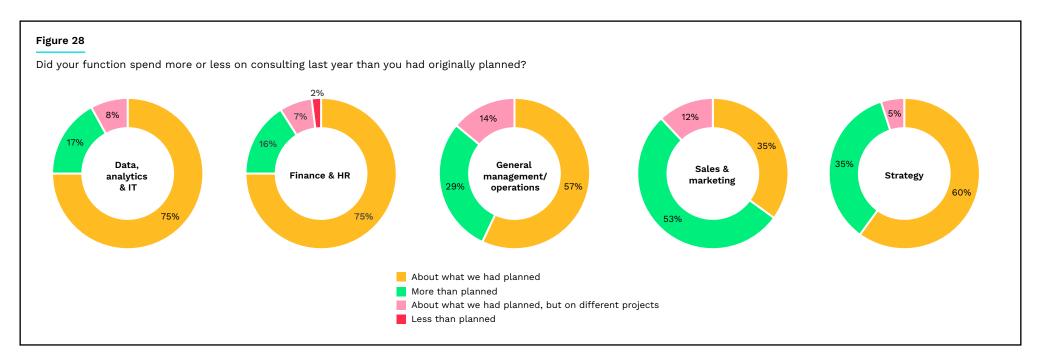

When we asked clients about which skills are the hardest to recruit, again two customer-centric capabilities come out strongly: the development of new products & services and customer experience. With the most important skill to clients in short supply, there is an opportunity for firms to help fill this gap. Other areas of concerns around workforce are more technology-focused, namely data & analytics and technology implementation. Business intelligence tools are becoming increasingly important for clients as they start to make the best use of emerging technologies, such as automation and AI.

The race to attract the right talent is particularly important at the moment, with 61% of clients telling us they expect over half of their workforce to need very different skills in the next three years. And these skills will not just relate to the adoption of new technologies—organisations say that expertise in risk & resilience, sustainability/ESG, and change management will be even more pressing.

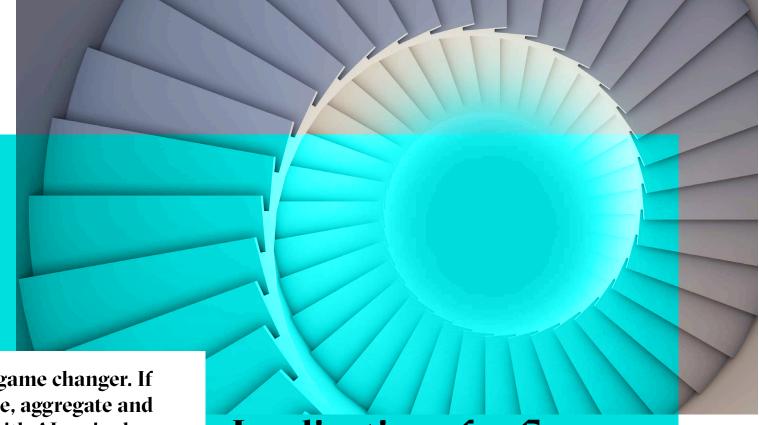

But that's not to say that this discipline is uniform. There are some functions that are more likely to spend more than they originally planned, and consulting firms have a better chance to be opportunistic here. While finance and IT departments tend to be more rigid in their plans for spending, over half of buyers of consulting services in sales & marketing functions told us they spent more than planned. Executives in strategy or operations departments are also more likely to be agile on how they spend on consulting projects throughout the year.

"Al could be a game changer. If you can analyse, aggregate and report data with AI, a single consultant can bring in more results in the same timeframe. This could result in some kind of performance element."

Nikolaus Schmidt, Klaiton

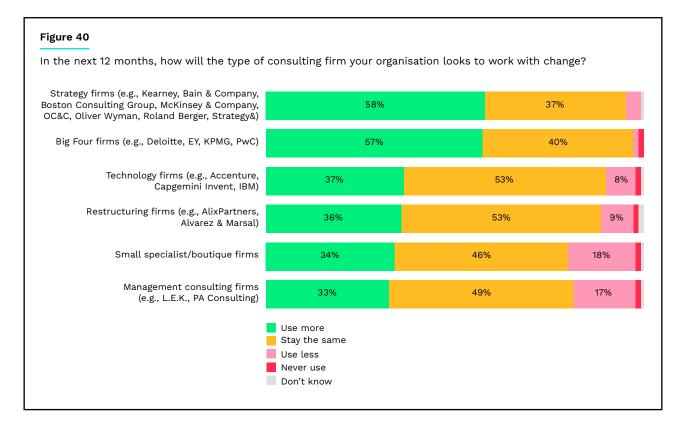

Implications for firms

| Clients expect firms to recognise, understand, and have the expertise to support their specific business challenges | 37 |
|---|-----|
| Firms will continue to feel price pressure from clients, as they see a lot of the work as commoditised | .39 |
| Clients expect generative AI to improve the consulting process | 40 |
| Clients are more likely to work with strategy firms than at any time over the last three years | 41 |

Clients are more likely to work with strategy firms than at any time over the last three years

Clients understand the business landscape in 2025 is a challenging one, with economic stagnation, geopolitical conflict, and ongoing uncertainty for businesses. Despite this, clients cannot stand still. In many cases, they may need to adapt their business model, become more resilient, enter new markets, or develop new products and services. Much of what they need to focus on is setting a new strategic direction to meet a series of evolving economic, political, regulatory, and consumer behaviour needs.

It is in this context that 58% of clients tell us they will work more with strategy firms over the next 12 months, a big jump from 34% in 2024. There is also a big increase in the proportion looking to work with Big Four, as 57% say they will also work more with these firms. These two firm types finish well ahead of the others, with only 37% of organisations saying they will work more with technology firms. It seems that despite clients telling us they need to improve their technology infrastructure, and in some cases adopt emerging technologies over the next 12 months, strategy firms and the Big Four still have the upper hand on clients saying they will work more with them.

"Since AI is heavily reliant on data, establishing an effective data strategy is crucial, and there's significant progress to be made in this area. AI continues to be a top priority in boardrooms, although the initial hype has diminished."

Damir Maras, PwC

Our approach to gathering data

The market for professional services is vast and highly dynamic, with deep roots spread out across the business world. The Source MegaModel helps you get to grips with the facts.

The MegaModel is the largest and most comprehensive database of its kind, anywhere in the world. It's used by the world's leading firms to identify where growth is coming from, which markets to invest in, and which sectors are driving demand.

Methodology—The MegaModel

MegaModel: Our Global Data Model

The quantitative market data in this report comes from our unique model of the global professional services market.

Rather than making high-level assumptions, this model has been built from the bottom up, sizing the market capability by capability—assessing how much work a firm earns delivering each professional capability within each sector and country. This results in a robust view of the size of the supply-side market, which can then be broken down to view the size of the market by country, sector, line of business, capabilities, and service.

Alongside this market segmentation, we also limit our market sizing and analysis to what we at Source call "big consulting"—work done by mid and large-sized firms (those with more than 50 people). Please note that we don't track the long, thin tail of work done by contractors and very small firms, as most readers of this report would not seek or be able to compete in this part of the market.

All of the data in the model is calibrated through extensive interviews with, and surveys of, professional services firms and their clients, allowing us to discuss broader trends in the market alongside detailed dimensions such as headcount. These interviews and surveys are supplemented with desk research, which allows us to assess the impact of wider macroeconomic trends on professional services. This, combined with our detailed modelling, results in a long-term view of the market that is able to support both historic and forecast data.

All figures given in this report are in euros.

US dollar to British pound US\$1 = £0.78

US dollar to euro US\$1 = €0.92

The data in this report is rounded to the nearest whole number or stated decimal place. As a result, totals may display small discrepancies.

Who did we speak to

Client perspective

We carry out a client survey to help us build a rich picture of how different trends in DACH are affecting clients' organisations and their use of consulting. Our survey focuses on trends in DACH, providing detailed insights into the nuances of the market. For this, we surveyed 150 senior clients of consulting firms from across DACH, all of whom work in organisations with more than 1,000 employees. This survey focuses on the following areas:

- How they expect to use consultants during 2025 and the first half of 2026
- Factors that affect the way clients work with consulting firms
- The ways consulting firms market themselves to clients and the impact this has on client decision making.

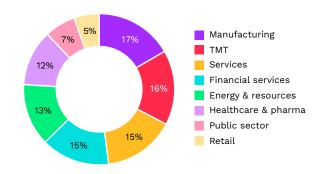

Insights from consultants

Throughout the year, Source analysts remain plugged in to the global consulting market through our bespoke research and consulting projects, adding further depth to our understanding of the consulting industry.

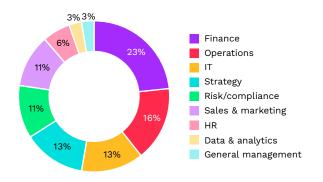

In-depth desk research

We also conducted a thorough PEST analysis in DACH that drills down into finer macroeconomic details on a holistic and sector-by-sector basis and allows us to fit our research into a wider macroeconomic picture.

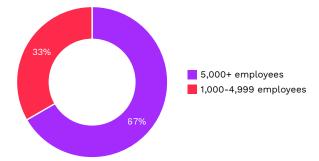

Respondents by sector

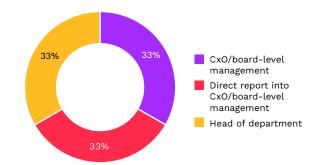

Respondents by function

Respondents by organisation size

Respondents by seniority

Definitions of sectors and services

Sectors

Energy & resources

Energy

Includes the exploration and production of energy, including oil, gas, coal, and renewables.

Utilities

Includes the delivery of electricity, gas, water, sanitation, and other related services.

Primary resources

Includes agriculture, chemicals and chemical products, commodities, forestry, fishing, metals, mining, and plastics.

Financial services

Banking

Includes retail banking, commercial banking, and lending.

Insurance

Includes general insurance (e.g., motor, home, pets, health—anything on an annual contract), life insurance, pension products, and retirement planning.

Private equity

Includes both consulting work for private equity firms and consulting work with private equity portfolio businesses.

Capital markets

Includes investment banking, trading of stocks and financial products, corporate finance, and broking.

Investment and wealth management

Includes private banking, high net-worth banking, investment management, trust funds, the management of pension funds, and asset management.

Manufacturing

Aerospace

Includes space research and technology, the manufacture of aircraft, aircraft parts, rockets and other space equipment, and tanks and ammunition.

Automotive

Includes the manufacture of motor vehicles, industrial vehicles, and vehicle supplies and parts.

Construction

Includes surveying, architectural, and engineering services, heavy construction, house building, and the building of infrastructure.

Consumer packaged goods

Includes the manufacture of clothes, foods, alcohol, tobacco, furniture, home furnishings, cleaning products, small arms, children's toys, and sports equipment.

Consumer and industrial electronics

Includes electrical components, household and industrial appliances, commercial and professional equipment.

Industrial products

Includes industrial machinery, steel and metal products, and plastic products.

Pharma & life sciences

Includes research into and the production of drugs, biological products, medicinal chemicals, and life sciences.

Healthcare

Includes private and publicly-funded healthcare, hospitals, laboratories, and medical equipment.

Public sector

Government

Includes federal/national, state/regional, local government, emergency services, justice, social services, public transport, and conservation.

Education

Includes public and private schools, universities, and libraries.

Defence

Includes national security and consulting around defence issues.

Not for profit

Includes non-commercial research organisations, religious, political and professional membership organisations, trusts, labour unions, and business associations.

Retail

Includes the selling of clothes, food, consumer goods, and automobiles.

Services

Logistics

Includes warehousing, storage, packing and crating, and distribution including cargo, freight, and haulage.

Business services

Includes services relating to law, accountancy, IT maintenance, security systems, advertising, employment agencies, and vehicle leasing.

Leisure

Includes museums, art galleries, theatre, golf courses, hotels, hospitality, travel agencies, restaurants, and bars.

Real estate

Includes estate agencies and operators of residential and commercial buildings.

Transportation

Includes private and people-related transportation, including airlines, airport management, train operators, rail infrastructure management, water transportation, courier services, and private bus services.

Technology, media & telecoms Telecoms

retecom

Includes telephone, mobile, digital, and other communication services.

High-tech

Includes IT-related devices, computer and computer-related devices, audio and video equipment, broadcasting and communication equipment.

Media

Includes radio, television, and digital broadcasting stations and services as well as printing and publishing of newspapers, periodicals, and books.

matters

Services

We've taken the lines of business and capabilities from our taxonomy that broadly align with traditional definitions of consulting and divided them into services that include the following. Please note that for some lines of business, for example, forensics, we've taken a subset of the relevant capabilities and excluded others.

Cybersecurity consulting

Cybersecurity advice, Cybersecurity incident response, Penetration testing & wargaming, Technology & security risk services.

HR, change & people strategy

Benefits, compensation & pensions, excluding actuarial & investment advice, Change management, Diversity & inclusion, Employee engagement, Governance & board effectiveness, HR strategy & effectiveness, Leadership, Organisational design & culture, Organisational training & development, Outplacement, Pension fund evaluation & advice, Performance management, Stakeholder management, Talent management, Team effectiveness & collaboration, Resource-efficiency strategy, Purpose-led strategy & change, Resource-efficiency implementation, Social impact & trust.

Operations

Benchmarking, Business continuity & recovery, Cost cutting, Customer service, DevOps, Distribution strategy, Lean & Six Sigma, Operational review, Outsourcing advice, Post-M&A integration, Process design, re-engineering & automation, Procurement/purchasing, Property & estate management, Sales & distribution planning, Sales force effectiveness, Supply chain management, Target operating model, Sustainable supply chain, Corporate, occupier services & facilities management, Integrated real estate developer services, Real estate deal/transaction services.

Risk & financial management

Operational risk, Programme risk, Responding to regulation, Risk management, Budgeting/financial planning process, Debt advisory, Finance function, Financial advisory, Financial restructuring & insolvency, eDiscovery, Forensic accounting.

Strategy

Capital allocation strategy, Commercial due diligence & valuation, Financial due diligence, M&A transaction strategy, Operational due diligence, Portfolio & investment strategy, Public-private partnerships, Technology due diligence, Business & financial modelling, Category management, Channel management, Corporate recovery & turnaround. Corporate restructuring, Corporate strategy, Market analysis & strategy, Policy formulation, Pricing, Strategic sourcing/ offshoring services, Real estate strategy, Environmental & social impact research, Macro/microeconomic research, Market research, Customer feedback, Customer segmentation, Employee feedback, Advanced analytics, Sustainable investment.

Technology & innovation

Ideation, Innovation management, Innovation strategy, Strategies for growth from innovation, Cloud advice, ERP consulting, IT strategy, planning & review, IT training, Programme management, Vendor selection, Clean technology, Green IT, Corporate identity, Graphic & UI design, UX & service design, Customer journey & UX benchmarking, Data visualisation, business intelligence & semantic laver.
